ACCOLIFT® CLH HOISTS - FEATURES

Friction Clutch & Upper Limit Switch

The friction clutch is an overload protection device that prevents lifting when overloaded. When the hoist is raised to high hook, the upper limit switch activates and stops the hoist motor (up direction only). This prevents unnecessary clutch wear.

Hoist Motor Brake

Simple fast acting conical style motor brake for years of trouble free operation.

Push Button Control

Compact design to enable one-handed operation. Rated NEMA 4 protection. Mushroom on/off button included. Push button cable has strain relief built in to prevent cable damage.

Electric Control Panel

Single speed hoists are reconnectable for 115/208/230V on single phase hoists and 208/230/460V on three phase hoists. Single speed controls include a running time meter and counter for hoist motion. Controls are housed in a NEMA 12 enclosure. Standard control transformer output is 115V with an option available for 48V. Standard power supply cord length is 15'.

Variable Frequency Drive

VFD hoists are available programmed for 2-speed operation. VFD hoists can be supplied for 230-1-60, 208/230-3-60 and 460-3-60 power supplies. Inverter provides run time for maintenance operations.

Heavy-Duty Hoist Motor

The hoist motor is a high torque design and is rated 30-minute duty (single phase, single speed motors are rated 20-minute). Class F motor insulation and standard thermal motor protection is included.

Load Sheave / Chain Guide

Full floating chain guide assures proper engagement of chain on load sheave. Load Sheave features 5 pockets for smoother operation and better distribution of the load. Hoist body includes a port for visual inspection of the load sheave.

Load Chain

Grade 80 load chain is case hardened and has a high resistance to wear and corrosion. All hoists are stocked with 20 feet of lift. Longer lifts are available per requirement. Nickel Plated load chain and Stainless Steel load chain is available as an option.

Hooks

Load hook is a forged carbon steel hook with a heavy-duty hook latch. Thrust bearing in hook allows 360° rotation to prevent twisting of load chain. Top hook, for hook suspended hoists, is nonrotating. Bullard hooks, Stainless Steel hooks and Bronze hooks are available as an option.

Chain Container

Chain container is standard equipment and is molded with thick polypropylene material to securely contain the chain and chain lubricant. Optional canvas containers and engineered containers for long lift applications are available as an option.

Gear Box / Oil Lubrication

The gearbox utilizes an alloy steel helical and spur gear reduction. Gear lubrication is easily accessible from the top of the hoist. The gearbox includes an inspection port for the chain pocket wheel. Food grade oil is available as an option.

Push / Pull Trolley

Trolley is adjustable for a range of 3.25" to 12" flange widths with no additional materials required. Side guide rollers are included to promote smooth trolley motion and to minimize wheel and beam wear. Wheels are dual tread design for operation on tapered or flat flange beams. Trolleys include drop down lugs and rubber bumpers as standard equipment.

Motorized Trolley

Trolley is adjustable for a range of 3.25" to 12" flange widths with no additional materials required. Side guide rollers are included to promote smooth trolley motion and to minimize wheel and beam wear. Wheels are dual tread design for operation on tapered or flat flange beams. Trolleys include drop down lugs and rubber bumpers as standard equipment. Trolley motor includes class F insulation and a disc type motor brake. Motor is rated for 30-minute duty (single phase, single speed motors are rated 20-minute) and includes standard thermal motor protection.

ACCOLIFT® CLH HOISTS - HOOK SUSPENSION

SINGLE PHASE / SINGLE SPEED HOOK SUSPENSION

ACCOLIFT® CLH HOISTS - CHAIN CONTAINER CAPACITIES

Hoist Capacity	Max. Lift With Standard Chain Bucket (ft.)	Max. Lift With Optional Chain Bucket (ft.)	Max. Lift With Optional Canvas Chain Bag (ft.)
1/2 Ton	39 (71964-107)	49 (71574-1038)	40 (71574-1264)
1 Ton	39 (71964-107)	49 (71574-1038)	40 (71574-1264)
2 Ton	25 (71964-207) or	65 (71574-1039)	20 (71574-1264)

Buckets may be available for longer lifts than stated above - please call factory with your application.

ACCOLIFT® HOISTS - FEATURES

Weston Style Mechanical Load Brake

Weston Style Mechanical Load Brake, working in conjunction with disc type motor brake, provides a dual braking system for load lowering control. Mechanical Load Brake can easily be inspected thru the inspection port provided on the top of the gearbox.

Hoist Motor Brake

Hoist motor brake is a direct acting DC rectified brake with exceptional stopping power providing cooler operating temperatures for the motor. Electric brake is designed for easy access and simple maintenance.

Overload Alert

Overload Alert is a current sensing device that stops the up motion of the hoist and sets off an audible alarm when the hoist motor draws too many amps due to an overload condition. When the hoist is lowered, the alarm stops and the overload device is reset.

Push Button Control

Compact design to enable one-handed operation. Rated NEMA 4 protection. Mushroom on/off button included. Push button cable has strain relief built in to prevent cable damage.

Electric Control Panel

Single speed hoists are reconnectable for 208/230/460V power supply. Controls are housed in a NEMA12 enclosure. Standard control transformer output is 115V with an option available for 48V. Standard power supply cord length is 15'.

Variable Frequency Drive

VFD hoists are available programmed for 2-speed operation. VFD hoists can be supplied for 230-1-60, 208/230-3-60 and 460-3-60 power supplies. Inverter provides run time for maintenance operations.

Heavy-Duty Hoist Motor

The hoist motor is a high torque design and is rated 30-minute duty. Class F motor insulation and standard thermal motor protection is included.

Load Sheave / Chain Guide

Full floating chain guide assures proper engagement of chain on load sheave. Load Sheave features 4 or 5 pockets (depending on model) for better distribution of the load.

Load Chain

Grade 80 load chain is case hardened and has a high resistance to wear and corrosion. All hoists are stocked with 20 feet of lift. Longer lifts are available per requirement. Nickel Plated load chain and Stainless Steel load chain is available as an option.

Hooks

Load hook is a forged carbon steel hook with a heavy-duty hook latch. Thrust bearing in load hook allows 360° rotation to prevent twisting of load chain. Top hook, for hook suspended hoists, is nonrotating. Bullard hooks, Stainless Steel hooks and Bronze hooks are available for some models as an option. Contact factory.

Chain Container

Chain container is standard equipment and is either molded with thick polypropylene material or fabricated from steel to securely contain the chain and chain lubricant. Optional canvas containers and engineered containers for long lift applications are available as an option.

Gear Box / Oil Lubrication

The gearbox utilizes an alloy steel helical and spur gear reduction. An access port is included on the top of the gear box to allow visual inspection of the mechanical load brake. Lubrication is easily maintained from the top of the hoist.

Push / Pull Trolley

Trolley is adjustable for a range of 3.25" to 12" flange widths with no additional materials required. Side guide rollers are included to promote smooth trolley motion and to minimize wheel and beam wear. Wheels are dual tread design for operation on tapered or flat flange beams. Trolleys include drop down lugs and rubber bumpers as standard equipment.

Motorized Trolley

Trolley is adjustable for a range of 3.25"* to 12" flange widths with no additional materials required. Side guide rollers are included to promote smooth trolley motion and to minimize wheel and beam wear. Wheels are dual tread design for operation on tapered or flat flange beams. Trolleys include drop down lugs and rubber bumpers as standard equipment. Trolley motor includes class F insulation and a disc type motor brake. Motor is rated for 30-minute duty and includes standard thermal motor protection.

* 5" to 12" on 7-1/2T model.

SERIES 421 PUSH-PULL END TRUCKS

For Underhung Single Girder Cranes

Designed for light or medium loads, Series 421 Push-Pull End Trucks are the basic component for easy-to-assemble underhung cranes.

- Furnished with heat treated gray iron wheels for 2 ton maximum crane capacities.
- Maximum crane span is 25'-0".
- End truck frames include drop lugs.
- Wheels are 4" diameter, flanged, dual tread permitting operation on standard "I" beams or flat flange beams. Wheels incorporate shielded, lifetime lubricated, single row ball bearings.
- End trucks are shipped with crane fabrication instructions and mounting hardware. Bridge beam and end stops are by others.

Model Number	Cap. (Tons)	Min. Size Runway Beam	Max. Allowable Load on Each Wheel (lbs.)	Net Weight (lbs.)
4210010	2	6"	1200	233

	20	12" x 31.8#	3
	25	15" x 42.9#	3-1/2

Warning: Only competent personnel familiar with standard fabrication practices should be employed to assemble these cranes because of the necessity of properly interpreting these instructions and for the purposes of determining appropriate compatible equipment and product applications. ACCO disclaims and responsibility for the quality of workmanship employed in the fabrication of a crane according to these instructions or the sufficiency of the system in which and to which this system or equipment is to be installed or the sufficiency of the system to sustain any particular load that may be imposed upon it. Contact ACCO for additional information if necessary.

HAND CHAIN HOISTS

ACCOLIFT® portable, lightweight hand hoists are compact and provide a dependable working tool for: industrial maintenance, construction sites, machine shops, and production situations where parts need to be positioned accurately but infrequently.

Construction Features:

Hooks: All hooks are drop forged, heat treated steel with spring type latches. Both hooks rotate 360° for easy rigging.

Mechanical Load Brake: Can hold a capacity load stationary at any position.

Hand Chain: Electric welded, close link galvanized coil chain, accurately and uniformly sized to seat properly in handwheel pockets.

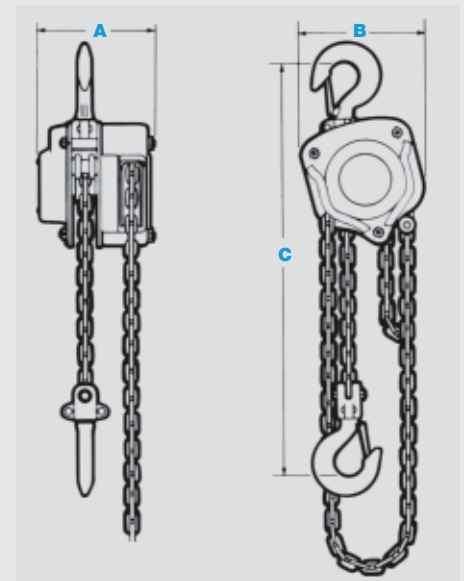

Load Sheaves: Deep cast pockets precisely fit the load chain. Load shafts are supported by prelubricated bearings for smooth operation.

Load Chain: Electric welded alloy steel chain is heat treated for wear resistance and strength. Accurately and uniformly sized to seat properly in load sheaves.

Frame: Fabricated rolled steel plate.

Covers: Protective steel covers can easily be removed for inspection and maintenance.

Options: Optional equipment available for this product includes chain container, weather cover, nickel plated load chain, stainless steel load chain, bronze hooks, stainless steel hooks and nickel plated hoist body. Please contact the factory for more information.

For hook dimensions and options, see page 26.

PLAIN TROLLEYS

ACCOLIFT® Plain Trolleys are light and easy to adapt to a wide range of beams. The trolley wheels include lifetime lubricated ball bearings for maintenance free operation. A perfect match to make the ACCOLIFT® electric or hand chain hoist and its load horizontally mobile.

Construction Features:

Side Frame: Side plates are rugged rolled steel

Wheels: Crown tread allows operation on tapered or flat flange beams

Bearings: Shielded, lifetime lubricated, single row ball bearings.

Suspension Lug: Pivot mounted suspension shaft designed to equally distribute the load to all wheels.

Options: Optional equipment available for this product includes bronze wheels and nickel plated body.
Please contact the factory for more information.

GEARED TROLLEYS

ACCOLIFT® Geared Trolleys are light and easy to adapt to a wide range of beams. The trolley wheels include lifetime lubricated ball bearings for maintenance free operation. A perfect match to make the ACCOLIFT® electric or hand chain hoist and its load horizontally mobile for short distances and accurate load positioning.

Construction Features:

Side Frame: Side plates are rugged rolled steel

Wheels: Crown tread allows operation on tapered or flat flange beams

Bearings: Shielded, lifetime lubricated, single row ball bearings.

Hand Chain: Electric welded, close link galvanized coil chain, accurately and uniformly sized to seat properly in handwheel pockets.

Chain Guide: Steel chain guide.

Suspension Lug: Pivot mounted suspension shaft designed to equally distribute the load to all wheels.

Options: Optional equipment available for this product includes bronze wheels, stainless steel hand chain and nickel plated body.
Please contact the factory for more information.

MOTORIZED TROLLEYS

Accolift Motorized Trolleys are rugged in design and built to be flexible right out of the box. Each trolley is adjustable for a beam flange range of 3.25" to 12" with no additional materials required. Side guide rollers are included to promote smooth trolley motion and to minimize wheel and beam flange wear. Wheels are dual tread design for operation on tapered or flat flange beams. Trolleys include drop down lugs and rubber bumpers as standard equipment. Motor includes class F insulation and a disc type motor brake. Motor is rated for 30-minute duty and includes standard thermal protection. Three phase trolleys include a VFD control, 2-button pendant, control transformer and a 30' power cord. Single phase trolleys include a single speed contactor control, 2-button pendant and a 30' power cord.

Construction Features:

- Motor:** 30-min duty motor with class F insulation, thermal protection and motor brake.
- Three Phase Control:** VFD control programmed for two speed operation.
- Single Phase Control:** Contactor control provided for single speed operation.
- Side Frame:** Side plates are rugged rolled steel.
- Wheels:** Dual tread design for operation on tapered or flat flange beams.
- Bearings:** Shielded, lifetime lubricated, single row ball bearings.
- Suspension Lug:** Pivot mounted suspension lug provides equally distributed load to all wheels.

LEVER HOISTS

Lightweight, portable, chain type lever operated puller. Increases a worker's efficiency in pulling, lifting, lowering, moving and skidding objects in industrial maintenance, construction and utility company applications. Minimal effort is required to move tons. The short handle and short stroke are designed to operate in tight places. Excellent for stretching cable and fencing, positioning machinery and building components.

Construction Features:

Frame/Side Plate: Rugged, lightweight steel design supports and protects internal mechanism.

Lever/Lever Block: Designed and constructed to be easily operated by one person. Helps absorb the shock of the load. Can be easily disassembled for maintenance.

Operation: Two levers and a knob control the operation of the ACCOLIFT® Lever Hoist. The lifting "lock" lever can only be engaged when the hoist chain is slack (not under load). The grip ring is then pulled to engage the load sheave. Choose "Up" or "Down" position on the handle to raise or lower the load.

Gears: Six tooth pinion gear and four pocket load sheave makes operation easy. Gears are permanently lubricated.

Mechanical Load Brake: Brake can hold a full capacity load stationary in any position. Load is not transferred back to handle during handle advancement.

Load Chain: Electric welded alloy steel chain is heat treated for wear resistance and strength. Accurately and uniformly sized to seat properly in load sheaves.

Load Block: Supports the suspension hook and allows it to rotate 360° under capacity loads.

Hooks: All hooks are drop forged, heat treated steel with spring type latches. Both hooks rotate 360° for easy rigging.

For hook dimensions, see page 26.

NUTTING®

Industrial trailers and non-powered material handling equipment of all types.

WARNING: Equipment described herein is not designed for, and should not be used for lifting, supporting, or transporting humans. Modifications to upgrade, rerate, or otherwise alter the hoist or crane equipment shall be authorized only by the original manufacturer or qualified professional engineer. Failure to comply with any one of the limitations noted herein may result in serious bodily injury.

WARRANTY: All equipment is covered by the following warranties: The Seller warrants to the original using Buyer thereof that the goods sold under this agreement are free from defects in workmanship and materials for a period of one year from the date of shipment to the using Buyer. No other express warranties are given and no affirmation of Seller or Seller's agents, by word or action, shall constitute a warranty. Any variations in details between the goods quoted herein and those covered in Buyer's specifications are due to standards of manufacture not to be construed as exceptions to the specifications.
