

# BULK BINS

## STACKABLE/ROLL-OVER

Apex custom sized bins are built to the customer's specifications when a variety of material handling applications require a special unit.

Our engineering department can help you design a bin suited to your needs.

Prices are quoted based on size, plate thickness, reinforcements, and options, such as stacking, fork pockets, drains, casters, paint and more.

◀ The standard Roll-Over Scrap Box is fabricated of 3/16" steel with 2" x 2" x 3/16" reinforcing angle around the top edge. Mounted on the bottom of this box are 2 1/2" x 7" fork pockets for forklift applications. Using roll-over forks on your forklift will dump this box with very little effort. All units are painted bright yellow machine enamel.

### — ROLL-OVER STANDARD SIZES —

CAPACITY	H	DH	W	DW	L	DL	WEIGHT
3/4 YD	33	36	33	36 1/2	33	36 1/2	435 LB
