

Eagle-GripTM attachments are the safest, most durable, quality built lift truck attachments available for handling drums. Eagle-GripTM attachments are completely mechanical, requiring no electrical or hydraulic connections to the lift truck. Easy Lift Equipment's products are manufactured, powder coated for durability and assembled in Newark, DE implementing the highest quality control standards in the industry. All Eagle-GripTM attachments are available on a free 30-day trial for in-plant evaluation and backed by a one-year unconditional warranty.

The EG1 Series lift truck attachments utilize an Eagle-GripTM light duty single automatic clamping mechanism for handling any size steel or plastic chimed drum. All Eagle-GripTM 1 & 2 Series attachments are knockdown attachments that bolt together.

The 30" long fork pockets with safety chain provide a quick and easy installation to any lift truck. The model EG1SCM-CM is a carriage mounted model designed to fit the carriage of any lift truck or stacker. A rubber belt cradle is optional on any EG1 model but is standard on any non-sparking

EAGLE-GRIPTM 1 SERIES ATTACHMENTS Light-Duty Single Clamping Mechanism 750 lb capacity per drum

Model EG1SCM-F Single Drum Attachment

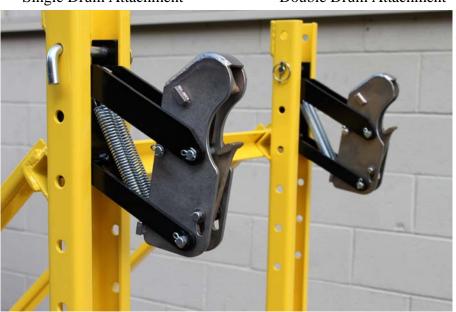

Model EG1SCM2-F Double Drum Attachment

Model EG1SCM-S-FQC with Scale and Quick-ClawTM cam lock options.

All Eagle-Grip[™] 1 models are available with a Spark Resistant Clamp option. The SRC option is provided with stainless steel outer housings, non-sparking jaws and a rubber anti-static belt that rests against the side of the drum.

EAGLE-GRIPTM 2 SERIES ATTACHMENTS

Light-Duty Double Clamping Mechanism 1000 lb capacity – 1 drum 1500 lb capacity – 2 drums

The EG2 Series lift truck attachments utilize an Eagle-Grip™ light duty double automatic clamping mechanism for handling any size steel, plastic or fiber chimed drum. The EG2 clamping heads swivel to grip misaligned drums. Double clamping mechanisms are recommended for handling heavy plastic & fiber drums or drums without lids.

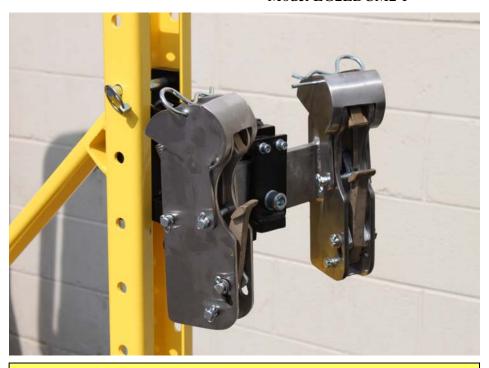

Model EG2LDCM2-F

Model EG2LDCM-F-S with scale option

Model EG2LDCM-FQC with Quick-ClawTM option.

All lift truck attachments for handling drums currently on the market have clamping mechanisms made of carbon steel. When these carbon steel clamping mechanisms contact steel drums and are elevated by the lift truck operator there are two metal surfaces scrapping against one another quickly. This metal on metal sliding action to grip the drums' chime is the greatest potential for creating a spark.

All Eagle-ripTM 2 models are available with a Spark Resistant Clamp option. The SRC option is provided with stainless steel outer housings and fiber drum guards, non-sparking jaws and a rubber antistatic belt that rests against the side of the drum. The stainless steel outer housings and guards eliminate any potential sparks as a result on the clamping heads contacting a steel drum.

EAGLE-GRIPTM 3 SERIES ATTACHMENTS

Heavy-Duty Single Clamping Mechanism 1500 lb capacity per drum

Totally enclosed 43" fork pockets with cam-lock safety chain

Heads adjust vertically for handling shorter height drums

The model EG3SCM-NF has a narrow 24" overall width to grip drums in tight areas or pallet racks

The Eagle-GripTM 3 Series lift truck attachments utilize heavy-duty single automatic clamping mechanisms for handling steel, plastic or fiber drums in high volume applications. The clamping mechanisms are completely mechanical, requiring no hydraulic or electrical connections to the lift truck. The model EG3SCM2-F is a double drum attachment which is narrower than two 55-gallon drums together. This enables easy unloading from trucks or double stacked overseas shipping containers. All EG3 models are provided with heavy rubber belts to eliminate any dents or cosmetic marring on the drum.

Non-sparking SRC option: All metal surfaces that contact the drum are constructed of non-sparking stainless steel with investment casted non-sparking jaws and thick anti-static rubber belts.

Step tiering drums without pallets saves valuable warehouse space

Heavy-duty positive clamping heads for high volume handling

The model EG3SCM-F can be converted to an EG3SCM2-F by adding another EG3SCM-CM

EAGLE-GRIPTM 4 SERIES ATTACHMENTS

Heavy-Duty Double Clamping Mechanism 2000 lb capacity per drum

The top of the line Eagle-Grip[™] 4 Series lift truck attachments are heavy-duty double articulating clamping mechanisms for high volume handling of plastic, fiber and steel chimed drums. Eagle-Grip[™] 4 Series attachments provide the safest available method of lifting and transporting drums with a lift truck.

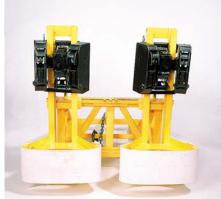

The EG4 clamping heads are completely mechanical requiring no electrical or hydraulic connections to the lift truck. Each drum is gripped by two pair or upper and lower jaws which are spaced about 6" apart. The two clamping heads equally divide the weight of the drum on each set of clamping jaws. This method of handling is strongly recommended when handing fiber and plastic drums in excess of 600 lb., light gauge open head steel drums or any drum in which the lid is removed. The swiveling action of the EG4 clamping mechanisms is operator friendly when gripping mis-aligned drums. When used as a double drum attachment, the model EG4DCM2-F can grip two drums simultaneously which are spaced as much as 9" apart.

All fork mounted models enable lift truck operators to install or remove the attachment in seconds. All models are provided with totally enclosed 43" fork pockets for use with lift trucks equipped with 42" forks. Longer fork pockets are available for lift trucks with forks longer than 42". In high volume applications, having fork pockets slightly longer than the forks themselves is strongly recommended.

All Eagle-Grip[™] Series 4 attachments are provided with a heavy rubber belts to rest against the lower side of the drum. The belt eliminates any cosmetic marring or dents to the drum being handled.

Heavy protective belts eliminate any cosmetic marring or dents

Double gripping heads are best for light gauge open head drums

EG4 double clamping heads equally divide the drum weight in two places on the drums chime. Double clamping heads are strongly recommended for handling heavy plastic or fiber drums

Model EG4DCM-CM

Eagle-GripTM Series 3 & 4 single drum attachments are available in 3 models:

The model EG4DCM-CM is a carriage mount which fits any Class II carriage

The model EG4DCM-F is the same carriage model mounted on an adjustable slide on fork mount frame.

The Model EG4DCM-NF is 24" narrow width assembly typically used for order picking, handling tightly nested drums or handling drums for pallet racks.

Model EG4DCM-F

All Eagle-Grip[™] attachments are available for handling flammable contents in hazardous areas. All metal surfaces that contact a metal drum must be non-sparking.

The Eagle-Grip 3 & 4 Series attachments with the SRC option include:

Inner and outer housings constructed of non-sparking stainless steel with an investment casted non-sparking alloy clamping jaws. The standard heavy rubber belts used to eliminate any dents or cosmetic marring on the side of the drum are upgraded to heavy anti-static rubber belts.

Quick-ClawTM Safety Restraint System

Secures and releases Eagle-Grip $^{\rm TM}$ attachments automatically – Fast and efficient – No operator dismount from lift truck required - Prevents slippage accidents – OSHA compliant

All Eagle-Grip[™] attachments include an OSHA required safety chain to secure the attachment to the lift truck. Series 3 & 4 attachments are equipped with a cam lock assembly which attaches to the fork lift carriage quickly without any tools.

When unloading trailers of drums, the operator must dismount the lift truck to remove the attachment when the need to move full pallets of drums is required. To re-secure the attachment, requires dismounting the lift truck once again to install the cam lock assembly.

The optional Quick-Claw™ Safety Restrain System locks any fork mounted Eagle-Grip™ model attachment onto the lift trucks forks automatically. Unique rotating cams bind to the heel of each fork when lifted off the ground. The cams retract and release the attachment when contact with the ground is made again.

Safety & Compliance: Over 90% of our customers do not use the standard safety chain assembly to secure the attachment to the lift truck. With the addition of the Quick-ClawTM Safety Restraint System, the attachment is secure the instant it leaves the ground. This method is compliant with all federal and state safety codes.

Increases Productivity: Cuts on costs and improves productivity while the driver focuses on the task at hand without the fatigue of dismounting to secure or unsecure the attachment to handle pallets.

Versatility and Reliability: Built to and last guaranteed to work on any lift truck.

Retrofit to Older Models: Can be added to older attachments. Call factory for details.

Preventative Maintenance Kits:

Keep your Eagle-GripTM Attachments in top condition by stocking our preventative maintenance kits.

Each P.M. Kit includes: all replacement springs, a belt and miscellaneous hardware at discounted pricing.

Kits are available for all Eagle-Grip models.

All two drum handling attachments require two P.M. Kits. Quick-ClawTM is a trademark of Lifting Technologies

GRIP & WEIGHTM - Scale Options for Eagle Grip Attachments

Increases Workplace Safety & Productivity By:

Eliminates excessive manhandling of drums to and from floor scales
Instantly checks the weights of incoming raw materials in drums while unloading
Providing easy weight verifications of outgoing wastes in drums
Drastically reduces the time required to inventory weights of partial drums manually

Model EG1SCM-F-S

Model EG1SCM-FQC-S

Model EG4DCMSRC2-F-IS

All Eagle-Grip[™] Series 1, 2,3, & 4 attachments can be equipped with custom load cells and indicators to provide a self contained means of weighing drums using a lift truck or stacker. There are no external connections to the lift truck besides the OSHA required safety chain.

The Eagle-GripTM 1 & 2 Series attachments are recommended for most industrial weighing and drum handling applications.

The Eagle-GripTM 3 & 4 Series attachments are necessary for high volume handling or when drum weights exceed 1000 lb.

All models are available with non-intrinsically safe or intrinsically-safe systems for weighing drums in hazardous areas. Attachments with intrinsically safe weighing systems are provided with stainless steel clamping mechanisms with non-sparking jaws and heavy anti-static rubber belts to support the lower third of the drum.

Eagle-GripTM attachments for weighing two drums at a time can require up to two indicators depending on the application.

Optional label printers can be included with any non-intrinsically-safe scale system.

Model EG2LDCM-F-S

Model EG4DCMSRC-NF-IS

Model EG4DCMSRC-NF-IS with Indicator on swing arm bracket

EAGLE-GRIPTM Model EL4F Heavy-Duty Double Clamping Mechanism 2000 lb capacity per drum

The all mechanical model EL4F automatic clamping mechanisms handle from one to four drums at a time without any hydraulic or electrical connections to the lift truck. Ideal for palletizing drums or loading & unloading trailers and oversea shipping containers in high volume drum handling applications. Simply position the center guide over the four drums, lower and lift. Once the drums are gripped, the clamping mechanisms safely secure the drums in place for transportation over dock plates and other unlevel surfaces.

To release the drums, fully lower the drums onto a pallet or floor then elevate the center guide upward.

The Model EL4F with SRC option is available for handling drums in hazardous areas. All metal surfaces that contact a metal drum must be non-sparking. The model EL4F-SRC includes: Outer housings, fins, center guides, rear guides and spider all constructed of non-sparking stainless steel with investment casted non-sparking alloy clamping jaws.

The Quick-ClawTM Safety Restraint System is also available for any EL4F model. The attachment locks onto the lift trucks' fork blades as soon as it is lifted off the ground.

In applications where lifting drums using a crane or overhead hoist is required, the model EL4CB is the perfect solution. The EL4CB can be purchased with the SRC option if required.

EAGLE-POLY GRIP ATTACHMENTS

800 lb. capacity per drum

Model EPG2-F slides on/off forks in seconds to move full pallets

Mechanical clamping arms hold drums securely while unloading

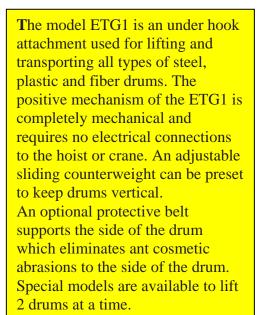

Can grip one drum on either side or both drums together

Drums rest against circular backrest for vertical support

European style plastic drums have steadily increased in numbers worldwide, especially among importers of fruit juices and other food products. Having a much larger lid or lifting chime, they are typically double stacked without pallets in overseas shipping containers and manhandled to be unloaded. The model EPG2-F can handle 1 or 2 of these containers at a time through the use of clamping arms which wrap around the tapered sides of the drum. This attachment slides onto the forks of any lift truck. It's fully automatic mechanical design requires no electrical or hydraulic connections to the lift truck. A safety chain with cam lock secures the attachment to the lift truck carriage in seconds without tools.

EAGLE-TALON GRIP ATTACHMENTS 1500 lb. capacity per drum

Model ETG1 can handle chimed drums of all sizes. Adjustable counterweight keeps drums of different weights and diameters perpendicular to floor when lifted. Used in conjunction with a hoist for palletizing drums off fill lines or placement onto secondary containment pallets.
