

Compact Series

The Autoquip Compact Series lift tables feature a small footprint, so they can fit into virtually any application or environment. With a proven double leg design, the Compact Series can both maximize travel while minimizing platform and base dimensions. These dependable American lifts consume less floor space and offer smaller platform sizes. Compact Series lifting solutions are field proven with thousands of units installed in a wide range of applications.

CORPORATION

Compact Series

KEY FEATURES

- **Gibbed/Trapped Rollers – Base and Platform** - no unexpected raising of table or legs
- **Lifetime lubricated bearings** - extended lift life
- **Solid steel leg construction** - extended lift life, with lesser deflection
- **Internal or Remote Power Unit** - more flexibility
- **Super Torque Motor** - speed, power, and durability
- **Meets ANSI MH29.1** - meets all relevant codes to insure a well built and safe lift

PRIMARY BENEFITS

Compact lifts achieve the same raised heights as conventional scissors lifts – but with reduced platform and base lengths. This unique lift design provides maximum ergonomic benefits – such as eliminating bending and minimizing reach-over, but in an overall footprint size that consumes less floor space.
