**THE WORLD'S MOST WIDELY TRUSTED
SAFETY CONTAINMENT SYSTEMS**

protect people, property and the environment

SPILL

The World's Most Widely Trusted Safety Containment Systems

Since 1906 customers have relied on Justrite for solutions to help protect workers and the environment, reduce fire risks, and improve productivity. We're committed to providing you product offerings in sync with evolving industry demands. Our comprehensive line includes products for handling and managing flammable liquids, such as code compliant safety cabinets and containers, smoking receptacles, drum handling equipment, and environmental spill containment products.

Our products are specifically engineered to promote workplace safety and efficiency making your job easier. We thoroughly test our products for excellent quality, reliability, and compliance to applicable codes and regulations. Their durability and our confidence in these products are backed by industry's strongest warranties—see inside back cover for details.

NEW We've added over 200 new models to our offering! Look for this logo throughout our catalog for innovative safety solutions that protect people and the environment against the inherent dangers of flammable and hazardous materials. See pages 4-5 for a snapshot of how these products can improve your environmental, health, and safety programs.

Explanations of table info in this catalog

Approval and Compliance Key

FM	Tested and approved by FM Approvals
UL/ULC	Underwriters Laboratories listed in the U.S. and Canada
TÜV	TÜV Technical Inspection Association certified
N	Complies with National Fire Protection Association (NFPA) Flammable and Combustible Liquids Code 30
O	Complies with Occupational Safety and Health Administration (OSHA) Regulations
I	Complies with the International Fire Code (IFC)
A	Complies with NFPA 1 Fire Code - 2012 Edition
A9	Complies with NFPA 1 Fire Code - 2009 Edition
H	Complies with NFPA 400 Hazardous Material Code
EN	Complies with European standards EN 14470-1 and EN 14727
E	Complies with Environmental Protection Agency (EPA) Regulations
S	Supports EPA Spill Prevention, Control and Countermeasures Rule (SPCC)
V	Validated by the EPA Environmental Technology Verification Program

Protect people and property with these new solutions for safe, dependable storage of hazardous liquids.

NEW!
PRODUCTS

For outdoor storage of large volumes of flammables, pre-engineered steel lockers are FM-approved and meet EPA, fire codes and insurance requirements – ready for immediate use to protect against chemical spills, fire, and poison hazards.

Outdoor Safety Lockers
Pages 40 – 45

Comply with new fire code requirements to properly store and segregate acids, bases, toxics, oxidizers and other hazardous materials in self-closing safety cabinets – available only from Justrite.

Hazardous Material Safety Cabinets
Pages 26 – 27

Take advantage of unused corner space to safely store flammables. Exclusive design gets the most out of limited floor space and keeps chemicals near point-of-use for improved efficiencies.

Sure-Grip® EX Corner Safety Cabinets
Page 15

Safe, secure, and compartmentalized storage for fuels, paints, and thinners – along with ample room for tools and other equipment found at construction and utility sites. Portable for easy relocation.

Safesite™ Combo Safety Chest
Page 16

Extreme fire resistance—keeps flammables protected for up to 90 minutes under fire conditions. Use in high risk environments requiring increased evacuation time, such as cruise ships, high-rise buildings, hospitals, offshore drilling sites, and more.

EN Safety Storage Cabinets
Pages 18 – 19

NEW!
PRODUCTS

Protect the environment and comply with EPA and SPCC regulations with innovative flexible spill containment:

- ✓ fast set-up
- ✓ folds easily
- ✓ portable
- ✓ stores compactly
- ✓ most available in custom sizes

Long-term outdoor spill containment for vehicles, heavy equipment, tankers and more. Patented design offers the quickest, easiest set up -- no assembly required.

Rigid-Lock QuickBerm® Plus
Page 76

Safe, drive-in spill containment for drums, IBC totes, and more. Single-piece, patented construction provides unobstructed floor space and protects against trip accidents.

Rigid-Lock QuickBerm®
Page 77

Versatile, portable berm deploys quickly for immediate spill response or personnel decontamination – folds down to a small size for storage in trucks, emergency vehicles, spill kits.

Rigid-Lock QuickBerm® Lite
Page 78

Protect against accidental slips and keep work areas safe and clean. For everyday use, these innovative products are ready for immediate response to dangerous leaks and spills. Fast set-up and easy fold-down for storage and quick access in multiple locations throughout your facility. Temporarily store drums, machine parts, batteries, and other leaky equipment or use to protect against roof and pipe leaks.

Don't see what you want? We can customize berms or safety cabinets for your specific application – check for details.

Why Do I Need a Safety Cabinet?

One of the leading causes of industrial fires is the improper storage and handling of flammable liquids. Safety cabinets help you safely store fuels, chemicals, and solvents to reduce the risk of fire and protect your people and property.

Safety cabinets serve critical functions:

- Improve awareness—high-visibility cabinet color and prominent labeling identify potentially hazardous chemicals
- Keep dangerous liquids safely organized and segregated
- Ensure safe evacuation time in the event of a fire
- Provide compliance with federal OSHA regulations and the National Fire Protection Association
- Increase maximum allowable quantities of flammable and combustible liquids in control areas
- Improve efficiency by locating materials near point-of-use
- Improve security with locking mechanism

Considerations when selecting a safety cabinet

- Federal, state, and local compliance requirements
- Size and type of container being stored
- Capacity needed
- Type of chemical being stored
- Security and safety features such as U-Loc™ padlockable handle, SpillSlope® shelves, Haz-Alert™ warning labels, all welded construction

Also look for cabinets that carry independent, third party certification from FM Approvals (FM-approved) or MPA Dresden (GS). These marks signify the cabinet will perform as expected and support property loss prevention.

Compliance

Each Justrite steel safety cabinet meets at least one or more of the following regulations:

- OSHA 1910.106
- National Fire Protection Association (NFPA) Flammable Liquid Code 30
- NFPA Fire Code 1
- International Fire Code (IFC)
- National Fire Code of Canada
- NFPA Hazardous Materials Code 400
- European EN standard 14470-1 and 14727

Most cabinets are FM approved and all are backed by an industry-first, ten-year warranty.

While regulatory codes do not mandate the specific color for a safety cabinet, industry has customarily observed certain colors for defined liquids.

Yellow for flammable liquids	Green for pesticides and insecticides
Red for paints, inks, and other combustible liquids	Silver or neutral colors for laboratory settings
Blue for corrosives and hazardous liquids	White, beige or gray for waste or outdoor lockers

Regulations do, however, specify construction details and the type of door style required

Code	Flammable Safety Cabinet Door Styles
NFPA 30 and NFPA 1, 2012 ed	Permits either manual or self-close doors
IFC	Mandates use of self-close doors only
NFPA 400	Mandates use of self-close doors only

Contact local jurisdictions for specific requirements.

Safety expertise since 1906

With over 300 models ranging in capacities from 4- to 115-gallons (15- to 435-liters), you can be assured of getting the highest protection, convenience, and durability in a safety cabinet that meets your specific need. If you don't find what you want, ask about our Custom Cabinet Program offering you the ability to design to your own specifications.

Use safety cabinets to keep your people and facility safe from a devastating fire. Get details on regulations, our cabinets and other products—visit our website to request a copy of our popular RedBook™... *Your Guide to Handling Flammable Liquids Safely.*

Justrite® Sure-Grip® EX Safety Storage Cabinets offer top performance for flammable liquid storage and protection.

EXtra safe, EXtra sturdy, EXtra secure

Fusible links hold doors wide open and melt at 165°F (74°C) for automatic closure (on self-closing models).

Sturdy 18-gauge (1-mm) double wall steel construction with 1-1/2-in (38-mm) of insulating air space.

Easy-close, self-latching doors; U-Loc™ handle (shown below) does not require manual rotation to engage mandatory three-point latch.

Fully welded, not riveted, construction holds squareness for longer life and offers greater protection in a fire since air gaps are reduced.

Continuous piano hinge provides smooth closure.

Durable and chemical-resistant, lead-free powder-coat paint finish, inside and out, retains high gloss look and minimizes the effects of corrosion and humidity.

Dual vents with built-in flash arresters strategically placed at bottom and opposite top.

45-gallon (170-liter) self-close door style

Concealed self-close mechanism provides obstruction-free access to top shelf space. Self-indexing doors guarantee they will close in sequence and ensure a tight closure from top to bottom (on self-closing models). Patent pending

Patented SpillSlope® safety shelves direct spills to back and bottom of leakproof sump. Adjustable on 3-in (76-mm) centers, they meet ANSI standards with a 350-lb (159-kg) safe allowable load.

Welded shelf hangers interlock with shelf to offer maximum "nonslip" stability with no flimsy brackets to lose.

2-in (51-mm) leakproof containment sump holds leaks and meets EPA requirements.

Complies with OSHA 29 CFR 1910.106 and NFPA Code 30, section 9.5.3; FM Approved

Adjustable leveling feet make it easy to balance cabinets on uneven surfaces.

Built-in grounding connector (on outside side panel) for easy grounding. Shown here with optional ground wire 08500.

Stainless steel, 3-point bullet self-latching system provides easy, fail-safe, positive door closure with increased heat resistance. Patent pending

Easily secure your contents—U-Loc™ handle includes double key set or can be padlocked (not included) for greater security. Patent pending

Patented SpillSlope® safety shelves direct spills to back and bottom of leakproof sump; adjust on 3-in (76-mm) centers for versatile storage. Meets ANSI MH28.1

Welded construction holds squareness for long life; door astragal provides extra sturdiness.

Highly visible HazAlert™ reflective label provides warning—"Flammable – Keep Fire Away" in English, Spanish, and French.

Using multiple cabinets helps you organize and segregate dangerous liquids.

Sure-Grip® EX Classic Safety Cabinets

Safe, dependable flammable liquid storage and protection

- *Independently fire tested and approved by FM Approvals.*
- *Avoid fines—meet regulations, fire codes, and insurance requirements.*

Protect workers, reduce fire risks, and improve productivity by storing flammable fuels and chemicals in code-compliant safety cabinets. Designed to meet OSHA and NFPA 30 standards, Sure-Grip® EX cabinets are constructed of sturdy 18-gauge (1-mm) thick double-wall, welded steel with 1-1/2-in (38-mm) of insulating air space for fire resistance. High-performance, self-latching doors close easily and securely for maximum protection under fire conditions. Fail-safe closing mechanism ensures three-point stainless steel bullet latching system works every time.

For added security, U-Loc™ handle comes with a cylinder lock and key set or accepts an optional padlock. Haz-Alert™ reflective warning labels are highly visible under fire conditions or during power outages when illuminated with a flashlight.

Patented SpillSlope® galvanized steel shelves direct spills to back and bottom of a leakproof sump. They adjust on 3-in (76-mm) centers for versatile storage. Cabinets also feature a leakproof 2-in (51-mm) bottom sump, dual vents with flame arresters, four adjustable self-leveling feet, grounding connector and trilingual warning label. Durable powder-coat finish provides excellent chemical resistance.

Self-closing models also meet the International Fire Code. They shut and latch automatically when a fusible link melts at 165°F (74°C) under fire conditions. Unique, concealed self-closing mechanism offers obstruction-free access to contents. All cabinets are backed by a ten-year warranty.

Sure-Grip® EX Safety Cabinets—Single Door

Full size, full storage capacity safety cabinets with a unique single-door design

These cabinets have all the same features and benefits as Justrite’s popular classic-style safety cabinets, with one convenient bi-fold, sliding door. Self latching and self closing, it is equipped with a fusible link to hold the door open during use and melts at 165°F (74°C) to automatically close under fire conditions. Heavy-duty steel dual-track guidance system at top and bottom ensures smooth closure. Industrial-strength spring-loaded piano hinge provides long lasting operation.

Place Slimline cabinet where floor space is limited.

Sure-Grip® EX Slimline Safety Cabinets

Gain valuable storage space even when floor space is tight

- Welded, 18-gauge (1-mm) steel double wall with 1-1/2-in (38-mm) insulating air space.
- U-Loc™ handle comes with double key set and accepts optional padlock for added security.

Fully compliant cabinets with compact design feature fire-resistant construction for the safe storage of flammable and combustible liquids. Use alone or alongside larger safety cabinets for expanded storage when floor space is limited. The standard Slimline cabinet is 18-in (457-mm) deep and fits flush alongside a 45-gallon (170-L) cabinet. The deep Slimline cabinet is 34-in (864-mm) deep and fits alongside a 60- or 90-gallon (227- or 341-L) cabinet. Both cabinets measure only 23-1/4-in (591-mm) wide.

Use color coding in your storage practices to organize and segregate liquids.

Slimline safety cabinets have all the same features as the larger safety cabinets including, a three-point, self-latching door with self-latching handle, a 2-in (51-mm) leakproof sump, and dual vents with integral flame arresters. Built-in grounding connector allows for proper grounding to reduce static build-up. Cabinets include three SpillSlope® galvanized steel shelves that direct spills to back and bottom into a 2-in (51-mm) leakproof sump. Under fire conditions when illuminated by a flashlight, highly reflective Haz-Alert™ warning labels shine brightly to alert emergency personnel to volatile contents.

Cabinets meet NFPA and OSHA regulations and are FM-approved. Self-closing models also comply with the International Fire Code.

892200

895400

Small cabinet footprint fits in the tightest spaces.

When additional storage space is needed, modular size fits nicely alongside existing cabinets.

Sure-Grip® EX Piggyback Safety Cabinets

Expand storage and safely segregate liquids

- Easily add up to 17-gallons (64-L) of additional capacity to existing cabinets.
- Fully compliant, fire-resistant design reduces the risk of fire.

Create a safe storage area for fuels, chemicals, or solvents without taking up valuable floor space. Piggyback cabinets are designed to mount on top of 30- and 45-gallon (114- and 170-L), manual or self-closing Sure-Grip® EX cabinets. They can also be used independently as a benchtop cabinet or stacked to provide additional storage. Turn it into a wall-mount cabinet with optional wall hanger assembly No. 25950.

The Piggyback cabinets have a lower-height, but offer the same protection as Justrite's taller safety cabinets. Constructed of sturdy 18-gauge (1-mm) thick double-wall, welded steel, they feature 3-point, self-latching doors that close easily and securely for maximum protection under fire conditions. Leakproof 2-in (51-mm) captures dangerous spills. U-Loc™ handle includes double key set and accepts optional padlock for increased security.

Cabinets meet NFPA and OSHA regulations and are FM-approved. Self-closing models also comply with the International Fire Code.

Piggyback cabinets can be stacked on each other or taller cabinets for better organization of liquids.

Sure-Grip® EX Countertop Safety Cabinets

Use on workbenches for easy access to often-used liquids

Get the fire protection found in larger sized Justrite® safety cabinets in a compact design measuring only 22-in (559-mm) high. Use these cabinets when storing lesser quantities of flammable liquids at a workstation. Portable size keeps work areas flexible. Includes one SpillSlope® safety shelf for storage of multiple small containers. Self-close model with concealed closing mechanism utilizes entire internal space for storage. For more countertop space, choose optional wall hanger assembly for easy mounting on a wall.

Sure-Grip® EX Compac Safety Cabinets

FM-approved safe storage for up to 15-gallons (57-liters) of flammable liquids

Fully compliant, compact-sized cabinets fit almost anywhere and provide protection even when space is at a premium. Popular 12-gal (45-L) size measures 35-in (889-mm) high to fit under most workbenches. Fire resistant design includes double-walled steel construction with 1-1/2-in (38-mm) of insulating air space and 3-point stainless steel bullet latch for fail-safe, positive door closure. Adjustable SpillSlope® safety shelf directs spills to back and bottom of leakproof 2-in (51-mm) sump. U-Loc™ handle comes with double key set and accepts optional padlock for security. Cabinets also feature dual vents with flame arresters, adjustable leveling feet, and grounding connector to prevent static build-up.

Cabinets meet NFPA and OSHA regulations and are FM-approved. Self-closing models also comply with the International Fire Code.

Mini Safety Cabinet

Safe flammable storage even when space is at a minimum

- Small footprint—place cabinet within quick reach.
- Maximize cabinet space with an adjustable shelf.

Keep most often used flammables for cleaning and maintenance within easy reach. Mini Safety Cabinet only measures 17-in (432-mm) wide x 8-in (203-mm) deep yet has the same great features as our larger cabinets—double-wall construction, 3-point latch, leakproof sump, U-Loc™ handle with double key set, and chemical-resistant powder-coat finish. Three bungee cords keep contents in place when transporting.

890200

10 Year
Limited Warranty

Easily relocate Mini Safety Cabinet to different locations throughout your facility.

Aerosol Can Benchtop Safety Cabinet

Place anywhere for hassle-free organization of aerosol cans

- Two roll-out shelves fit up to 24 aerosol cans.
- Welded, 18-gauge (1-mm) steel double-wall with 1-1/2-in (38-mm) insulating air space.

Designed to store aerosol cans, cabinet features 24-gauge (0.6-mm) galvanized steel roll-out shelves with “easy-glide” plastic rollers and stop guard protection. Each shelf comes with an insert that holds twelve 2-3/4-in (70-mm) diameter x 10-in (254-mm) tall cans. Inserts are removable for easy cleaning. Small in size yet the aerosol cabinet has safety features found in our larger cabinets—double-wall construction, 3-point latch, U-Loc™ handle with double key set, and chemical-resistant paint finish.

Cabinet meets NFPA and OSHA regulations.

Conveniently locate liquids near work areas.

Sure-Grip® EX Undercounter Safety Cabinets

Conveniently locate liquids near work areas

- Back wall vents with flame arresters permit venting if needed.
- Recessed toe kick improves ergonomics, mounts flush with other cabinetry.

Take advantage of undercounter space to safely store flammable liquids. Each cabinet is sized and fitted with a recessed 3-1/2-in H x 2-1/2-in D (89-mm x 64-mm) toe kick to allow the user to stand closer to the work surface, which means less leaning and better ergonomics. Fully compliant to NFPA and OSHA regulations, cabinets feature all-welded 18-gauge (1-mm) double-wall steel construction with 1-1/2-in (38-mm) insulating air space for fire resistance. Adjustable SpillSlope® shelf directs any spills to back and bottom of a leakproof 2-in (51-mm) sump. Three-point stainless steel bullet latch provides fail-safe, positive door closure. Flush-mounted U-Loc™ handle comes with double key set and accepts optional padlock for added security. Self-leveling feet adjust to 1-1/8-in (29-mm) for alignment on uneven floors. When fully extended, cabinet heights raise 5/8-in (16-mm).

Sure-Grip® EX Wall-Mount Safety Cabinets

Make the most of usable storage space—hang cabinet above workbench for easy access

Gain storage space near work areas without taking up extra floor space. Eye-level positioning allows for easy access to solvents. Cabinets offer the same protection as Justrite's larger cabinets—including double-walled construction, 3-point self latching doors, leakproof sump, dual vents with flame arresters, grounding connector, and SpillSlope® safety shelving. Models come complete with mounting hardware.

Sure-Grip® EX Corner Safety Cabinet **NEW**

Maximize corner space while retaining full storage capacity

Designed especially for environments where space is at a minimum, this cabinet fits nicely into an empty corner to maximize the amount of space available for storage. Improve efficiency by locating materials near point-of-use and get the most out of limited floor space. Available in 30- (114-L) and 45-gallon (170-L) capacities, with both manual and self-closing door styles, Sure-Grip® EX corner safety cabinets help to increase maximum allowable quantities of flammable and combustible liquids in control areas.

Designed to meet OSHA, NFPA 30, and NFPA 1 standards, corner safety cabinets have many of the same features as the classic line of flammable safety cabinets including a fail-safe, three-point self latching door, double-walled construction with 1-1/2-in (38-mm) air space, dual vents, a grounding connector and a large trilingual warning label identifying contents. A leakproof 2-in (51-mm) sump captures dangerous spills.

Safely store nine 5-gal (19 L) safety cans with room to spare.

Storing hazardous materials?

Identify and safely store acids, bases, oxidizers, or toxic materials — see pages 26-27 for a wide variety of cabinet sizes.

UV-protected powdercoat paint finish for long wearing protection.

Safesite™ Combo Safety Chest **NEW**

Provide safe, secure storage for flammables along with tools and other valuables

Protect flammables from ignition sources, misuse or theft by storing them in a specially designed Safesite Combo Safety Chest. It provides protected storage of fuels, paint thinners, solvents, or other flammables typically found at construction and utility jobsites.

Top quality features include heavy-duty, 16-gauge welded steel body finished in a tough UV-protected powdercoat paint that stands up to abusive conditions. Fire resistant 16-gauge steel safety compartment liner with 18-gauge lid provides double walled protection—accepts 5-gallon (19-L) Justrite safety cans. Designed with dual security, Safesite™ provides superior protection from unauthorized access. Dual security—outside lid offers padlock security while inside compartment features U-Loc™ technology.

Sure-Grip® EX High Security Safety Cabinets

For environments requiring increased security against unauthorized access

- High visibility steel bar across both doors deters prying.
- Fully compliant, fire-resistant design.

Use these cabinets in higher-risk environments such as correctional facilities, construction site trailers, schools and maintenance areas without worrying about break-ins. Steel bar across both doors, padlock holes that accept optional No. 5 Master Lock® and fully welded, 18-gauge (1-mm) double-wall construction deter prying.

Cabinets come in four colors—yellow and red for flammables and combustibles, green for pesticides and blue for corrosives. Adjustable SpillSlope® shelves direct any spills to back and bottom of a leakproof 2-in (51-mm) sump. The green and blue cabinets also include poly liners for shelves along with a poly sump liner to protect against corrosion. Three-point stainless steel bullet latch provides fail-safe, positive door closure. Cabinets include dual 2-in (51-mm) vents with integral flame arresters, built-in grounding connector, and leveling feet for stability on uneven surfaces.

Cabinets meet NFPA and OSHA regulations and are FM-approved.

Crossbar and sidebar provide double-layer steel strength—accepts No. 5 Master Lock® padlock for security.

Premium Insulated Cabinets—ULC Listed

Double-wall construction with 2-in (55-mm) thick high-density insulation throughout provides increased fire protection

- Welded, 18-gauge (1-mm) steel double-wall with insulation.
- Intumescent tape expands to eight times its volume to seal doors.

These cabinets withstand the stringent fire testing requirements of the National Fire Code of Canada. A full 2-in (51-mm) of high-density insulation within the walls, doors, ceiling and floor plus intumescent tape that expands to seal doors provide the ultimate fire protection.

Adjustable shelves direct any spills to back and bottom of a leakproof 2-in (51-mm) containment sump. U-Loc™ handle comes with double key set or accepts optional padlock for added security. Cabinets feature a three-point lock, dual 2-in (51-mm) vents with integral flame arresters, and leveling feet.

Cabinets are ULC listed, and meet NFPA and OSHA regulations.

Ninety minutes of fire protection provides high level of safety when point-of-use storage is required.

90-Minute EN Safety Storage Cabinets **NEW**

Extreme fire resistance for high risk environments—store flammables with 90-minutes of protection

- EN, OSHA and NFPA compliant—Independently fire tested and approved by FM Approvals and MPA Dresden.
- Hybrid-close door action—manual close doors stop in any position, but self close in the event of a fire to protect contents.
- Security—Independent cylinder locks on each door includes locking state indicator (red/green).

Constructed using multiple layers of fire-resistant gypsum and mineral fiber insulation, cabinet body has a rugged powder coated steel exterior that provides excellent corrosion resistance. Under fire conditions, intumescent strips expand and hermetically seal all gaps to reduce heat entering the cabinet, providing 90-minutes of content protection and extended evacuation time. Hybrid style doors open or close manually and include a damper that adjusts the force needed to move the doors. In the event of a fire, the built-in fusible link system releases to allow automatic closure of doors at 122°F (50°C). Cabinets are EN compliant, FM-approved and meet NFPA 30, NFPA 1, and OSHA standards.

Powder-coat finish steel shelves adjust on 1-1/4-inch (32-mm) increments and have a load capacity of 165-lbs (75-kgs). Shelves with 1-inch (30-mm) high ledge prevent small containers from easily sliding off. Removable bottom sump with detachable perforated insert features a 3-sided lip seal to ensure leaks or spills from shelves are captured at the bottom of the 3-in (76-mm) sump, keeping containers stored in the sump clean and dry.

Haz-Alert™ reflective tri-lingual warning labels are highly visible under fire conditions or during power outages when illuminated with a flashlight. Cabinets also feature adjustable leveling feet, an integrated transport base for easy repositioning (base cover optional), and mandatory air vents per EN 14470-1. Vent butterfly valve closes securely at 158°F (70°C) in the event of a fire. Vents include flame arresters and caps for FM compliance.

1. Upper and lower vents with butterfly valve close automatically at 158°F (70°C) under fire conditions. Bright interior provides maximum visibility in low light conditions to quickly identify contents.
2. Independent cylinder locks on each door includes locking state indicator (red/green).
3. Integrated transport base accepts pallet jack for easy repositioning of empty cabinets. Accepts optional, removable base cover.
4. Removable sump with separate detachable perforated insert allows spills to flow into sump for easy cleaning, and keeps containers elevated to stay clean and dry.

30-Minute EN Safety Storage Cabinets **NEW**

Safely store and segregate flammables—30 minutes of extreme fire-resistance

- EN, OSHA and NFPA compliant—Independently fire tested and approved by FM Approvals and MPA Dresden.
- Hybrid-close door action—manual close doors stop in any position, but self close in the event of a fire to protect contents.

Designed to provide 30-minutes of fire resistance, attractive two-toned yellow cabinet is constructed with a body of melamine resin and flame retardant special plates, and a steel door front covered by a textured, durable powder-coat finish. Under fire conditions, special intumescent protection strips expand and seal hermetically to close gaps between the door(s) and frame to reduce heat entering the cabinet. Hybrid style door(s) operate manually and stop in any position, but in the event of a fire, the built-in fusible link system will melt and release to allow automatic closure of door(s) at 122°F (50°C). Cabinets are EN compliant, FM-approved and meet NFPA 30, NFPA 1, and OSHA standards.

Cabinets have many of the same features as the 90-minute model, including leakproof, removable bottom sump with perforated insert, adjustable powder-coat finish steel shelves with 1-inch (30-mm) lip and load capacity of 165-lbs (75-kgs), Haz-Alert™ warning label, and a ground connection. Air vents close securely at 158°F (70°C) in the event of a fire and include flame arresters and caps. Independent cylinder lock on door(s) provide added security. Bright interior color offers maximum visibility to stored goods. Integrated transport base makes it easy to reposition empty cabinets. Accepts removable base cover (optional).

Position single-door extreme fire resistance cabinets where space is limited. Easily add a second cabinet if storage needs increase.

Cabinet mover helps transport cabinets easily through doorways and spaces where a pallet jack is not practical.

Use these cabinets for the safe storage of flammables under fume hoods, benches or counters.

Sure-Grip® EX Under Fume Hood Safety Cabinets

Fully compliant and designed for safe storage of solvents and flammables in laboratories

- Welded, 18-gauge (1-mm) steel double-wall with 1-1/2-in (38-mm) insulating air space.
- Back wall vents with built-in flame arresters.
- Stainless steel, 3-point bullet self-latching system.

Perfect for use in laboratories. Cabinets measure 35-3/4-in (908-mm) high to fit under fume hoods, benches or counters. The 4-inch (102-mm) high x 3-in (77-mm) deep toe kick allows the hood user to stand closer, which means less leaning and better ergonomics. Cabinets feature an adjustable SpillSlope® shelf that directs any spills to back and bottom of a leakproof 2-in (51-mm) sump. U-Loc™ handle comes with double key set and accepts optional padlock for added security. Durable powder-coat finish, inside and out, provides maximum chemical resistance. Cabinets come in three colors—safety yellow, stainless silver or light neutral to complement laboratory settings. Single-door cabinets are available in either left or right-hinge door configuration. Highly reflective Haz-Alert™ hazard labels at top and bottom provide easy visibility.

Note: 35-3/4-in (908-mm) height includes leg levelers installed and extended 5/8-in (15.9-mm).

Sure-Grip® EX Flammable Waste Safety Cabinets

Temporary on-site storage solution for flammable waste

- Large “Flammable Waste” warning label on door identifies contents.
- Welded, 18-gauge (1-mm) double-walled steel with 1-1/2-in (38-mm) insulating air space for fire resistance.

Use these safety cabinets for the temporary collection and segregation of flammable liquid waste. Clearly marked cabinets prevent mix up of contents. Cabinets feature adjustable SpillSlope® shelves that direct any spills to back and bottom of a leakproof 2-in (51-mm) sump. Three-point stainless steel bullet latch provides fail-safe, positive door closure. U-Loc™ handle comes with double key set and accepts optional padlock for added security. Durable powder-coat finish, inside and out, provides maximum chemical resistance. Cabinets feature dual 2-in (51-mm) vents with integral flame arresters, built-in grounding connector, and leveling feet for stability on uneven surfaces.

8930053

Cabinets meet NFPA and OSHA regulations and are FM approved. Self-closing models also comply with the International Fire Code.

Sure-Grip® EX Flammable Waste Drum Storage Cabinets

Safely segregate and store larger quantities of flammable waste

- White color quickly identifies cabinet for waste liquid storage.
- Half-depth shelf provides additional storage—sized to provide enough space to accommodate a drum equipped with a pump or funnel.

Temporarily store flammable liquid waste in drums awaiting pick up and disposal in these cabinets for vertically stored drums. Cabinets are constructed of sturdy 18-gauge (1-mm) thick double-wall, welded steel with 1-1/2” (38-mm) of insulating air space for fire resistance. High-performance, self-latching doors close easily and securely for maximum protection under fire conditions. Fail-safe closing mechanism ensures three-point stainless steel bullet latching system works every time. U-Loc™ handle comes with a cylinder lock and key set and accepts an optional padlock for added security. Cabinets also feature dual vents with flame arresters, four adjustable self-leveling feet and built-in grounding connector to prevent static build-up. Durable powder-coat finish provides excellent chemical resistance.

Sure-Grip® EX Vertical Drum Safety Cabinets

Safely store solvent filled drums

- Fully compliant with OSHA and NFPA regulations.
- Sturdy 18-gauge (1-mm) steel, welded for strength and greater fire resistance.

Use these vertical drum safety cabinets to safely store 30- to 55-gallon (110- to 200-L) drums. The removable, adjustable, half-depth shelf provides enough head space to accommodate a drum with a pump or funnel so the cabinet can be used as a pumping or waste accumulation station, and also allows you to store additional materials or spare accessories.

Fire-resistant design features double-wall construction with 1-1/2 in (38-mm) of insulating air space, dual 2-in (51-mm) vents with flame arresters, a three-point bullet latching system for failsafe, positive closure, and a 2-in (51-mm) sump to capture spills. U-Loc™ handle comes with double key set and accepts optional padlock for added security. Built-in grounding connector allows for proper grounding to reduce static build-up.

896260

896160

Models with drum rollers facilitate the movement of heavy drums; models with removable drum support keeps drum elevated off cabinet sump.

*OSHA 29CFR 1910.106(d)(3) states that not more than 60 gallons (227L) of Category 1, 2, or 3 flammable liquids, nor more than 120 gallons (454L) of Category 4 flammable liquids may be stored in a safety cabinet.

Sure-Grip® EX Double-Duty Drum Safety Cabinets

Store drum and safety cans in a single cabinet

Use these double-duty cabinets to safely store flammable liquids contained in drums and safety cans. They feature two separate compartments that fit one vertical 55- or 30-gallon (200- or 110-L) drum and up to twelve 5-gallon (19-L) safety cans. Sturdy 18-gauge (1-mm) double-wall steel construction offers excellent durability.

Cabinets feature self-latching, three-point locking doors for maximum protection under fire conditions. Latching system engages automatically when the door is pushed closed. Drum compartment features drum rollers in the sump and one half-depth SpillSlope® safety shelf; can compartment includes two full-size adjustable SpillSlope® shelves that direct spills to back and bottom of a 2-in (51-mm) sump.

Sure-Grip® EX Horizontal Drum Safety Cabinets

Use for drum storage or as a dispensing station

- Complies to OSHA and NFPA regulations.
- Double-wall construction with 1-1/2 in (38-mm) insulating air space for fire resistance.
- Independently fire tested and approved by FM Approvals.

Safely house horizontally positioned drums for use in gravity-flow dispensing applications. The interior provides space for a drip-can and includes tracks to guide drum cradle (sold separately below) into position.

899320 (shown with optional cradle 08800)

Sturdy, 18-gauge (1-mm) welded steel with durable powder-coat finish, inside and out, provides excellent chemical resistance. Three-point, stainless steel bullet latching system ensures positive door closure and maximum protection under fire conditions. U-Loc™ handle comes with a cylinder lock and key set and accepts an optional padlock for added security. Additional safety features include a 2-in (51-mm) leakproof sump to capture dangerous spills, dual 2-in (51-mm) vents with flame arresters, and a built-in grounding connector for proper grounding to reduce static build-up.

Use proper grounding techniques when dispensing flammable liquids

Proper grounding reduces the risk of fire . . .

Choose from a variety of bonding and grounding wires—see page 73.

Accessories for Drum Cabinets

Makes drum handling easier

Use the cabinet ramp to easily load drums into a cabinet using a cart. Ramp fits over the sill to keep securely in place. Tread design on surface maximizes traction. Fits all styles of Justrite drum cabinets. Load limit is 750-lb (340-kg). Not for use with wheeled drum cradle 08800.

Use drum roller for vertical storage cabinet 8962001 (sold separately above) to easily maneuver heavy drums. Use wheeled drum cradle for positioning a horizontal drum for gravity-flow dispensing.

Ramp side rails provide strength and guidance

Multiple adjustable SpillSlope® safety shelves provide storage versatility for different sized paint cans.

Sure-Grip® EX Safety Cabinets for Combustibles

Safe storage for paints and inks

- Fully compliant to OSHA and NFPA regulations.
- Independently fire tested and approved by FM Approvals.

Easily separate and identify combustible liquids using these red safety cabinets. Adjustable shelves accommodate many smaller paint tins, aerosols and inks found in printing, painting, furniture and motor vehicle operations. Cabinets feature sturdy double-wall, 18-gauge (1-mm) steel construction with 1-1/2-in (38-mm) of air space and dual flame arresting vents. Three-point, self-latching doors close easily and securely for maximum protection under fire conditions. Flush-mounted U-Loc™ handle reduces dangerous catches from passing traffic—comes with double key set and accepts optional padlock for added security. Patented SpillSlope® safety shelves are designed to direct spills to back and bottom into a 2-in (51-mm) leakproof sump. Under fire conditions when illuminated by a flashlight, highly reflective Haz-Alert™ warning labels shine brightly to alert emergency personnel to contents.

Sure-Grip® EX Wall Mount Cabinet for Aerosol Cans

Store multiple aerosol cans on a wall near workspace for easy access

This cabinet has the same features and benefits of Justrite's larger safety cabinets for storage of combustibles, except it's designed to be mounted on a wall to save on floor space. With a depth of only 12-in (305-mm) and three shelves, it safely holds over 100 aerosol cans and comes complete with mounting hardware.

Sure-Grip® EX Safety Cabinets for Pesticides

Designed for the safe and secure storage of agricultural and turf management chemicals

- Double-wall construction with 1-1/2-in (38-mm) insulating air space for fire resistance.
- Easy close, 3-point self-latching doors.
- Dual vents with integral flame arresters.

Improperly stored pesticides present a substantial danger to people and the environment. Designed specifically to store pesticides, herbicides, fertilizers and other turf chemicals, these green cabinets feature welded 18-gauge (1-mm) steel construction with powder-coat finish for excellent chemical resistance. SpillSlope® steel shelves fitted with polyethylene tray adjust on 3-in (77-mm) centers to accommodate a wide variety of containers. Thirty-gallon (114-liter) models No. 893004 and 893024 include an additional polyethylene top work tray which can be placed on the top of the cabinet for a handy work surface. U-Loc™ handle comes with double key set and accepts optional padlock for added security. Three-point stainless steel bullet latch provides fail-safe, positive door closure. Cabinets feature trilingual Haz-Alert™ reflective warning label and leveling feet.

All cabinets meet NFPA and OSHA regulations and are FM-approved. Self-closing models also comply with the International Fire Code.

Safely store turf management chemicals to reduce the risk of accidental poisons and fires.

For indoor maintenance areas in these environments:

- Golf courses
- Park districts
- Amusement parks
- Nurseries
- School campuses
- Lawn care companies
- Farms
- Cemeteries
- Pest control companies

Segregate and identify hazardous materials to ensure a safe working environment.

Encased self-closing mechanism provides obstruction-free access to top shelf space. Fusible link melts at 165°F (74°C) to automatically close door(s) under fire conditions.

Safety Cabinets for Hazardous Materials **NEW**

Identify and safely store hazardous materials such as acids, bases, oxidizers, or toxic materials

High-performance cabinets feature all-welded, 18-gauge (1-mm) double-walled steel construction with 1½-inch (38-mm) air space, a 2-inch (51-mm) leakproof sump, U-Loc™ handle, dual vents with flame arresters, adjustable self-leveling feet, and ground wire connector. Application-specific labels identify contents to safely store and segregate incompatible chemicals.

Self-closing door(s) with a three-point, stainless steel bullet latching system securely close for maximum protection under fire conditions. They self-index and self-latch to close in sequence to ensure a tight closure from top to bottom.

For increased chemical resistance against leaks or drips, steel SpillSlope® adjustable shelves include a polyethylene tray that sits on top of the shelf, as well as a separate polyethylene liner for the bottom sump. The popular 30-gal (114-L) cabinet includes an extra polyethylene work tray that can be placed on top of cabinet for a handy work surface.

Cabinets are FM approved (except for 4-gal /15-L models), and come with a ten-year warranty.

10 Year
Limited Warranty

ChemCor® Lined Safety Cabinets **NEW** for Hazardous Materials

Seamless ChemCor® finish protects interior cabinet surfaces from rust and corrosion

For superior protection against corrosion from drips and off-gassing from harsh chemicals, use ChemCor® lined safety cabinets. They feature a unique, flame-coated thermoplastic finish on interior doors, shelves, walls, ceiling, and sump. The non-porous, seam-free surface eliminates the need for corrosion-prone rivets or fasteners. It resists staining and cleans up easily. Popular 30-gal (114-L) cabinet includes a separate polyethylene work tray that can be placed on top of cabinet for a handy work surface.

Cabinets are FM approved (except for 4-gal/15-L models), and come with a ten-year warranty.

Store small quantities of hazardous materials at point-of-use for quick and easy access.

Label pack includes ten content specific labels.

Safely store corrosives in fire-resistant steel safety cabinets.

Sure-Grip® EX Classic Safety Cabinets for Corrosives

Specially designed for safely storing corrosives in laboratories

- Protect laboratories and personnel from damaging corrosives.
- Powder-coat finish specially formulated to resist acids, bases and solvents.

Justrite blue steel safety cabinets for corrosives have the same quality safety features as the cabinets for flammables. All models come with double-wall construction, dual vents, grounding wire connections, adjustable shelves, leakproof sills, three-point self-latching doors and leveling feet. Polyethylene trays fit over galvanized steel shelves and a separate polyethylene liner for the bottom sump helps resist aggressive chemicals. Easily remove the liner for quick cleaning of drips and leaks. The popular 30-gallon (114-L) 2-door cabinets also include an extra polyethylene work tray that can be secured to cabinet top for a handy work surface. An all epoxy baked-on powder-coat finish, inside and out, provides increased chemical resistance. FM-approved.

Using non-flammable corrosives?
See page 55 for quick pouring, translucent polyethylene containers designed to resist acids and caustics.

Sure-Grip® EX Slimline Cabinets for Corrosives

Compact footprint offers versatile storage options

Use Slimline-style cabinets to expand storage capacity—modular size fits nicely alongside existing cabinets. They have all the same features as the larger corrosive safety cabinets including a three-point, self-latching door with U-Loc™ handle, a 2-in (51-mm) leakproof sump, and dual vents with integral flame arresters.

For increased corrosion protection, cabinets include polyethylene trays that fit on top of three galvanized steel shelves. Under fire conditions when illuminated by a flashlight, highly reflective Haz-Alert™ warning labels shine brightly to alert emergency personnel to corrosive contents. FM-approved.

Small footprint of Slimline-style cabinets fits the tightest spaces.

Sure-Grip® EX Countertop and Compac Cabinets for Corrosives

Make the most of your available space

Countertop and compac cabinets let you customize your work areas and keep your most frequently used fluids close at hand. These specialty cabinets have the same features as our larger cabinets plus galvanized steel shelves with attached polyethylene trays and a separate polyethylene bottom sump liner that can be easily removed for cleaning drips and leaks. Baked-on blue epoxy powder-coat finish—inside and out—resists acids, bases and solvents for added chemical resistance. Compac cabinets are FM-approved.

Easily expand existing storage capacity by mounting piggyback cabinet on top of Justrite's 30- or 45-gallon cabinet.

Sure-Grip® EX Piggyback Cabinets for Corrosives

Use on bench tops or add to taller cabinets to meet increased storage needs

- Add up to 17-gallons (64-L) of additional capacity to existing cabinets.
- Compact design for easy stacking.

Create a safe storage area for acids or bases without taking up valuable floor space. Piggyback cabinets are designed to mount on top of 30- and 45-gallon (114- and 170-L), manual or self-closing Sure-Grip® EX cabinets. They can also be used independently and stack easily to provide additional storage. Turn it into a wall-mount cabinet with optional wall hanger assembly No. 25950.

The piggyback cabinets offer the same protection as Justrite's taller safety cabinets for corrosives. Constructed of sturdy 18-gauge (1-mm) thick double-wall, welded steel, they feature 3-point, self-latching doors that close easily and securely for maximum protection under fire conditions. Leakproof 2-in (51-mm) sump captures dangerous spills. U-Loc™ handle includes double key set and accepts optional padlock for increased security. FM-approved.

Free survey promotes workplace safety . . .

Justrite's STUD-E™ survey identifies ways to do your job safely and efficiently—visit [www.justrite.com](#) to learn more and sign up.

Sure-Grip® EX Undercounter Cabinets for Corrosives

Take advantage of unused undercounter space

- Double-wall 18-gauge (1-mm) construction with 1-1/2-in (38-mm) insulating air space.
- Leakproof 2-in (51-mm) sump safely captures spills.
- U-Loc™ handle includes double key—accepts optional padlock for increased security.

Safely store corrosives under a workbench or lab counter for quick and easy access. These safety cabinets incorporate the same quality features as Justrite flammable cabinets but also include galvanized steel shelves with attached polyethylene trays and a separate polyethylene bottom sump liner that can be easily removed for cleaning drips and leaks. Toe kick allows user to stand closer to counter—less leaning and better ergonomics. Toe kick dimensions are 3.5 in (89 mm) H x 2.5 in (64 mm) D. Baked-on blue epoxy powder-coat finish—inside and out—resists acids, bases and solvents for added chemical resistance. FM-approved.

Self-latching doors include paddle handle with cylinder lock and keys.

Extra Accessories

Equip your safety cabinet with accessories for storage versatility

- For dark blue hazardous material cabinets on pages 26-27.
- For light blue corrosive cabinets on pages 28-31.

Justrite galvanized steel shelves hold up to 350-lb (159-kg) and adjust on 3-in (76-mm) centers to meet specific workflow needs. Customize your cabinet by adding shelves to increase storage space and accommodate different sized containers. Place polyethylene trays over shelves for corrosion protection when storing corrosive liquids. Three options are available—combination shelf with poly tray, shelf alone or poly tray alone.

Save floor space and use optional wall hanger assembly on smaller cabinets when wall mounting is desirable. Two kits are available—for 4-gallon (15-liter) and 12- and 17-gallon (45- and 64-liter) Justrite safety cabinets.

ChemCor® Lined Safety Cabinets for Corrosives

Superior corrosion protection combined with fire protection in a single cabinet

- 100% seamless thermoplastic coating inside the cabinet.
- Double-wall, 18-gauge (1-mm) welded steel construction.
- 2-in (51-mm) leakproof containment sump.

Get complete protection from harsh acids and corrosive chemicals plus the durability and fire protection of Justrite steel cabinets in a single unit. Unique, flame-coated, nonporous thermoplastic coating lines walls, ceiling, sump, inside doors, and shelves for superior protection from rust and corrosion. Specifically formulated powder-coat finish on cabinet exterior provides long life and extra resistance to deterioration from harsh chemicals.

All ChemCor® Cabinets include two labels—“Base” or reflective Haz-Alert™ “Acid”—to be placed by the end user. SpillSlope® shelves adjust on 3-in (77-mm) centers to accommodate a wide variety of containers. Three-point stainless steel bullet latch provides fail-safe, positive door closure. U-Loc™ handle comes with double key set and accepts optional padlock for added security. Other features include dual vents with flame arresters, grounding connector, and adjustable leveling feet.

Under fume hood cabinets feature a 4-in (102-mm) high x 3-in (77-mm) deep toe kick that allows the user to stand closer to the hood which means less leaning and better ergonomics. Cabinet height of 35-3/4-in (908-mm) includes leg levelers installed and extended 5/8-in (15.9-mm).

Under counter (22-gal/83-L) free-standing cabinets feature a smaller toe kick that measures 3-1/2-in (89-mm) high x 2-1/2-in (64-mm) deep. Free standing 30-gallon (114-L) models No. 8930022 and 8930222 include an extra polyethylene work tray which can be used as a handy work surface on the top of the cabinet.

1. Internal ChemCor® coating guards against deterioration from spills and off-gassing from harsh chemicals. Seam-free, non-porous surface resists stains and cleans easily.
2. Fusible link on self-closing models melts in the event of a fire to automatically close doors if inadvertently left open.

For protection when storing harsh, non-flammable corrosives . . .

Justrite's 100% polyethylene cabinets are the solution—available for undercounter or countertop use. See page 34 for details.

Store harsh acids under a counter for safe, convenient access.

Polyethylene Acid Cabinets

One-piece construction provides excellent resistance to harsh acids and corrosives

These blue, hollow-bodied, polyethylene cabinets withstand highly corrosive acids and offer maximum protection against chemical corrosion and leaks. Both models are clearly labeled for ACID contents and accept a padlock (not included) for added security.

Countertop Cabinet stores up to two 1-quart (4-L) bottles. Door can be hinged from either side for best worktop space utilization. Polyethylene spill tray inside contains leaks and can be removed for easy cleaning. A separate polyethylene tray stores under the cabinet and can be used as a handy work tray.

Undercounter Cabinet holds up to thirty 1-quart (4-L) containers. Two segregated compartments each with an adjustable shelf let you store a variety of containers while recessed area in both doors hold small containers. Two removable sumps slide out for easy cleaning of incidental spills. Two vent holes (with removable caps) at rear accommodate pressurized vapor removal systems.

Wood Laminate Acid Cabinets

Durable and highly chemical-resistant

Safely store highly corrosive liquids such as phenol, nitric acid and sulfuric acid in these wood laminate storage cabinets. Long lasting wood construction along with stainless steel handles and hinges provide exceptional resistance to corrosion from harsh acids. Shelf adjusts on 1-1/4-in (32-mm) centers to accommodate a wide variety of containers. Cabinets include adjustable leg levelers, Haz-Alert™ reflective labels, and double key set for safety and security.

Countertop model 24120 is ideal for smaller quantities used at workbench level. Use the undercounter model 24140 as a free standing piece. It includes a removable, easy-to-clean polyethylene work surface top that is recessed 5/8-in (16-mm) to help contain incidental leaks.

Solid Polyethylene Acid Cabinets

Sturdy, smooth construction in an attractive design

- Suitable for highly aggressive liquids—no metal parts to corrode.
- Three-point door latch on larger units offer secure closure and vapor control.
- Toe kick on undercounter model allows user to stand closer to counter—less leaning, better ergonomics.

Solid polyethylene white acid cabinets have excellent chemical resistance to handle the most corrosive chemicals. A protective, all-welded bottom sump and a clean, sleek design complement any laboratory settings. Fully welded, liquid-tight 2-in (51-mm) sump contains accidental spills and makes clean up a snap. Shelf on larger units adjust on 3-in (76-mm) center. Door accepts a padlock for security.

Document Storage Boxes

Keep your important papers readily available while protecting them from moisture and dirt

Safely store manuals and documents in these weather-resistant polyethylene storage boxes. Each box is bright red for high visibility and features a smooth area for labels. Use the label pack provided that includes two blank labels and labels printed “SDS” and “Instruction Manual”. Boxes come with heavy-duty double-sided tape for easy installation. Large size accepts SDS binder; medium and large sized units accept padlock when security is a concern.

Ideal for storage of:

- Safety data sheets
- Instruction sheets
- Receiving bills
- Evacuation plans
- Schedules
- Plant layouts
- Inventory checklists
- Operator manuals
- Emergency contacts
- Certificates
- Medical records

Double sided tape is provided for mounting on surfaces that should not be penetrated by hardware such as safety cabinets.

VaporTrap™ Safety Cabinet Filter

Improves your work environment by reducing employee's inhalation exposure to VOC's

Install a VaporTrap™ Filter to reduce harmful VOC vapors inside your safety cabinets. Activated carbon filter medium contained in a stainless steel mesh cartridge adsorbs the volatile organic chemical vapors from cabinets storing flammable liquids. Sturdy 4-in x 5-1/2-in (102-mm x 139-mm) magnetized base offers flexible placement anywhere within the cabinet. Date notation area on label serves as a reminder for replacement; life cycle varies based upon vapor types and concentrations.

Description	Nom. Dimensions Filter L x D	Model No	Ship Wt lb/kg
VaporTrap™ Filter (2 pk.)	8.75 x 2.25 in (222 x 57 mm)	29916	4/2

Note: Due to variables such as the chemical itself, its purity, or its vapor pressure, temperature, humidity, charcoal age, etc., it is difficult to estimate VOC vapor adsorption rates. The Justrite VaporTrap™ Carbon Filter is not intended to be used as a substitute for using safe closed containers as required by OSHA and the EPA. It is important to clean up spills and residues from the cabinet and containers.

For increased safety, position one or two VaporTrap™ Filters anywhere inside the cabinet.

Safety Cabinet Accessories

Accessories offer organization and convenience

Steel Shelf Dividers fit all Justrite cabinets with 14-in (355-mm) deep shelves. Simply place over shelf and slide into position as desired.

Seismic Bracket Kit provides increased stability—ideal for earthquake or hurricane prone areas. One kit secures any safety cabinet to a wall or floor. Because there are no holes created, the fire protection properties of the cabinet remain intact and the cabinet maintains FM approval.

Leg Riser Frame provides sturdy, stable support for easy relocation of empty cabinet with forklift or pallet jack. High leg frame makes it easy to clean underneath and keeps cabinet away from floor moisture. Includes leg levelers and safety warning label: “Forklift Only When Empty”.

Rolling Cart makes it easy to move a heavy safety cabinet—transport solvents and chemicals directly to your work area. All welded 1/8-in (3-mm) thick heavy-duty steel and 5-in (127-mm) poly caster wheels with brakes for added safety. Push handle is removable. Fits any cabinet 43-in W x 18-in D (1092-mm x 457-mm) with a maximum height of 44-in (1118-mm).

Prevent placing dangerous items on top of cabinet . . .
Add a sloped cabinet cover—ideal when working on scaffolds. Visit our website and search for model # 25987.

Durable, weather resistant aluminum construction offers long-lasting, safe storage of LPG and compressed gas cylinders.

Aluminum Cylinder Lockers

No rust solution to storing LPG and compressed gas cylinders

- 100% welded aluminum construction won't rust, corrode or discolor.
- Exclusive solid roof panel slants to back to shed water and ice.
- Ships fully assembled—saves set-up time.

Heavy gauge, 0.065-in (1.65-mm) thick aluminum mesh and extruded (not bent) frame add rigidity to these cylinder lockers. Wire mesh sides prevent dangerous build up of flammable gases. Heavy-duty, all welded aluminum construction provides superior strength yet is 66% lighter than steel for easy placement and handling—saves on shipping cost. Thick metal panels and welded security lug (order padlock separately) on front panel deter tampering. Aluminum naturally stands up to abusive outdoor conditions and keeps your property clean. Includes 4 labels—2 warning and full/empty cylinder identification.

Lockers meet NFPA 58 for LPG storage and OSHA 1910.110 regulations. LPG vertical lockers also comply with Canadian Standards Association CSA-B149.2.

23001

23006

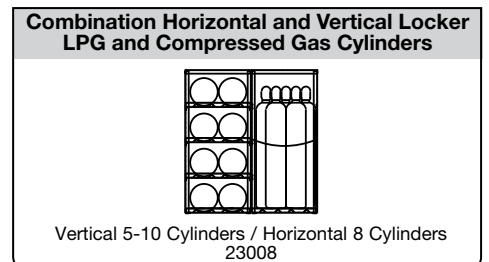

23005

23003

Eleven modular styles provide an efficient solution to expanded, multi-cabinet storage.

23003

1. Sloped roof design sheds water and ice. Solid top reinforces stability.
2. Includes warning and identification labels.
3. Extruded 0.125-in (3-mm) thick, heavy aluminum framework provides superior strength.
4. Easy-to-use rack positions cylinders securely and stores 20- and 33-lb (9- and 15- kg) cylinders.
5. Heavy, expanded, 0.065-in (1.65-mm) thick aluminum mesh panels and all-welded construction resist abusive outdoor elements—won't rust or discolor.
6. Padlock lug for security.
7. A pre-drilled hole at each corner accepts 0.5-in (12.7-mm) anchor bolts for maximum security and stability.
8. Cylinders stay clear of ground with heavy-duty bottom rack on horizontal locker or strong floor plate on vertical storage locker.

Sixteen-drum locker with optional steel ramp simplifies drum loading.

Outdoor Safety Lockers – Non-Combustible NEW

Safe, secure storage for flammables and hazardous chemicals

- Leakproof, all welded sump with galvanized steel grate flooring.
- 42-in (1.07-m) wide steel door system with 3-point lock.
- Chemical and UV resistant coating, inside and out.

Protect people and the environment and meet insurance requirements by storing hazardous materials in rugged, FM-approved Outdoor Safety Lockers. Non-combustible construction with heavy gauge steel and built-in secondary containment, every locker is fully compliant to meet EPA 40 CFR, NFPA 30 and NFPA 1 regulations. Proper chemical storage reduces poison hazards and accidents, minimizes contamination of chemicals, and prevents unwanted, costly fines.

Each locker features natural draft ventilation, NFPA 704 diamond decal for content identification, anchoring plates for hold down protection, and multiple static grounding connections for maximum safety. Forklift channels permit easy relocation.

Choose explosion relief panels for the storage of highly volatile Class 1A or dispensing of Class 1 A and 1B flammables as defined by NFPA – always check with the local authority having jurisdiction to ensure safety by following all local regulations, including proper setback requirements.

1. Air vents on both sides
2. Inside grounding lug
3. Leakproof sump with removable, galvanized steel grate floor
4. High visibility safety strip
5. Forklift channels
6. 3-point latching system
7. Outside grounding lug and anchor plate
8. Explosion relief design with blow-out panels

For added convenience and safety . . .
 Include ramp, shelving, grounding kit, fire protection and more – see page 44-45 for optional accessories.

Note: Door height on 2- and 4-drum models is 51-in (1.30-m) high and 80-in (2.03-m) high on 6- through 16-drum models. *Dimensions include mounting plates and door hardware. In most instances, locker sizes 2- through 6-drum are available to ship via a closed container truck, which can potentially reduce freight costs as compared to flat bed shipping alternatives.

See page 2 for Approval and Compliance Key

Six-drum locker with 42-in (1.07-m) wide steel door allows easy access to contents. Shown with optional ramp

Outdoor Safety Lockers—Agri-Turf™ **NEW**

Designed for the safe and secure storage of agricultural and turf management chemicals

- Galvanized steel shelving provides extra storage space.
- R-11 insulation in walls, ceiling and sump walls for temperature control—available on select models.
- GFI receptacle with weatherproof cover.

Safely store herbicides, fungicides, pesticides, fertilizers and other agri-chemicals in these FM-approved lockers. Durable heavy-duty steel construction plus chemical and UV resistant green coating, inside and out, ensure long life. Natural draft ventilation, multiple static grounding connections and vapor-resistant exterior light with photocell promote safe storage and handling practices. Galvanized steel grate flooring along with leakproof secondary containment provide safe and quick cleanup. Use the convenient forklift channels for easy relocation. Each locker is fully compliant to meet EPA, NFPA 30 and NFPA 1 regulations.

Models with capacities 205 cubic feet (5.8 cubic meter) and larger also include a dust-proof interior light with weatherproof switch. Optional accessories for added convenience and safety include a loading ramp, grounding kit, fire protection, and heating and cooling packages.

Dust proof interior light on sizes 205 cu. ft. and larger

R-11 insulation in walls, ceiling, and sump walls

3-tier shelving (total 9 shelves) on sizes 205 cu. ft. and larger

Vapor-resistant exterior light with photocell

Weatherproof GFI receptacle and light switch

Note: Door height on 52- and 105-cu ft models is 51-in (1.30-m) high and 80-in (2.03-m) high on 205- through 506-cu ft models.

*Dimensions include mounting plates and door hardware. For exterior light and GFI receptacle add: 7-inch (178-mm) to W on 52- and 105-cu ft models; 3-inch (76-mm) to W and 6-inch (152-mm) to D on 205-, 296-, and 506-cu ft models; 6-inch (152-mm) to W and 5-inch (127-mm) to D on 387-cu ft model.

**Shelves for 52- and 105-cu ft lockers are two-tier and back wall only. All other locker sizes have three-tier on back and side walls.

In most instances, locker sizes 52- through 205-cu ft are available to ship via a closed container truck, which can potentially reduce freight costs as compared to flat bed shipping alternatives.

Six-drum locker with optional ramp offers a convenient way to load or unload heavy drums using a drum dolly.

Outdoor Safety Lockers—2-hour Fire-Rated NEW

Fire-rated construction for safe storage of drums of flammables and combustibles

- 90-minute fire-rated door—third party tested and labeled.
- Gravity air flow vents—UL Listed fire dampers with fusible links.

Manufactured with fire-rated and weatherproof construction, each 2-hour locker has an FM-approved fire-rated wall and roof design and meets EPA 40 CFR, NFPA 30 and NFPA 1 regulations. Multiple layers of fire-resistant gypsum wall board are encased between exterior heavy gauge steel and interior galvanized sheet steel for maximum durability. A leakproof, all welded sump provides compliant secondary containment of hazardous liquids. Galvanized steel grate flooring removes easily for cleaning.

Gravity air flow vents include UL Listed fire dampers and fusible links for maximum safety. Hydraulic door mechanism ensures door will automatically close. Forty-two inch (1.07-m) wide door comes with UL Listed keyed lockset for security. Additional safety features include static grounding connections, anchoring plates, and NFPA 704 diamond decal.

Designed to be placed near existing structures and/or property set-backs, 2-hour fire-rated lockers provide a safe yet convenient storage solution. This improved proximity advantage over non-combustible lockers allows for more efficient use, distribution and storage of your flammables and combustibles. NOTE: Please check with your local authority having jurisdiction for set-back requirements and the correct wall/roof rating needed for your application.

Lockers are also available with FM-approved explosion relief panels that release at 20 psf to reduce the damage associated with a potential explosion.

Independently tested and approved 90-minute fire-rated door

Note: Door height on 2- and 4-drum models is 51-in (1.30-m) high and 80-in (2.03-m) high on 6- through 16-drum models. *Dimensions include mounting plates and door hardware. In most instances, locker sizes 2- through 6-drum are available to ship via a closed container truck, which can potentially reduce freight costs as compared to flat bed shipping alternatives.

Outdoor Safety Lockers—4-hour Fire-Rated **NEW**

Higher fire rating—provides proximity advantage over non-combustible and 2-hour locker models

- 3-hour fire-rated door—third party tested and labeled.
- Gravity air flow vents—UL Listed fire dampers with fusible links.
- Leakproof all welded sump.

Manufactured with fire-rated and weatherproof construction, each 4-hour locker has an FM-approved fire-rated wall and roof design and meets EPA 40 CFR, NFPA 30 and NFPA 1 regulations. Multiple layers of fire-resistant gypsum wall board are encased between exterior heavy gauge steel and interior galvanized sheet steel for maximum durability. A leakproof, all welded sump provides compliant secondary containment of hazardous liquids. Galvanized steel grate flooring removes easily for cleaning.

Gravity air flow vents include UL Listed fire dampers and fusible links for maximum safety. Hydraulic door mechanism ensures door will automatically close. Forty-two inch (1.07-m) wide door comes with UL Listed keyed lockset for security. Additional safety features include static grounding connections, anchoring plates, and NFPA 704 diamond decal.

Designed to be placed within close proximity of existing structures and/or property set-backs, 4-hour fire-rated lockers provide a safe yet convenient storage solution. This proximity advantage over non-combustible and 2-hour lockers allows for the most efficient use, distribution and storage of your hazardous chemicals and drums of flammable liquids. NOTE: Please check with your local authority having jurisdiction for setback requirements and the correct wall/roof rating needed for your application.

Lockers are also available with FM-approved explosion relief panels that release at 20 psf to reduce the damage associated with a potential explosion.

Designed for close placement to existing structures, 4-hr fire-rated lockers provide a safe and convenient storage solution.

Outdoor Safety Lockers – Optional Accessories **NEW**

Accessorize your locker with options that improve function and add convenience

Customize your locker to meet specific applications with a variety of optional features and accessories designed to meet code and increase safety.

- Add sturdy steel ramps to simplify loading or unloading heavy drums with a drum dolly.
- Add galvanized steel shelving for organized, easy access to smaller containers.
- Add heating and/or air conditioning where comfort, chemical stability or freeze protection is a concern.
- Choose from two varieties of fire protection – fuse linked extinguishers or an integral dry chemical system.

Use the descriptions below, combined with the charts on the next page, to determine the accessories available with each style of safety locker.

**Grounding Kit
Model 915505**
Kit comes with rod – 5/8-in (16-mm) diameter x 8-ft (2438-mm) L, wire and connector

Loading Ramp
Steel with anti-skid yellow paint
• **Model 915001:**
48-in (1219-mm) W x 120-in (3048-mm) L
• **Model 915003:**
48-in (1219-mm) W x 88-in (2235-mm) L

**Shelving
Models 915101 - 915105**
Galvanized steel shelving. Two-tier, 16-in (406-mm) wide with mounting brackets—back wall only
Not available on locker models with explosion relief panels. Shelf package for 2- and 4-drum models (915101) will limit the ability to load locker to full drum capacity.

**Fiberglass Grate with Sump Liner
Models 915201 - 915211**
High density polyethylene (HDPE) sump liner and fiberglass grate flooring for acid and corrosive chemical spill resistance

**Basic Fire Protection System
Models 915401 Model 915403**
BC Type, FE-227 extinguisher unit, ceiling mounted and fuse linked

**Dry Chemical Fire Suppression System
Model 915405**
• FM-approved, UL Listed, ABC Type, dry chemical system with agent cylinder
• One pull station and means of remote annunciation

**Interior Light and Fan Package
Model 915501**
• Interior explosion-proof light with exterior on/off switch — UL listed
• Explosion-proof mechanical ventilator tied to light switch for forced vapor removal
• Explosion-proof conduit and wiring with seal-offs

**Exterior Light
Model 915503**
Explosion-proof and photocell activated
Only available when ordered with Interior Light/Fan Package 915501.

Explosion-Proof Wall-mounted Heaters
• **Model 915301:** 6,000 btu
• **Model 915303:** 12,000 btu
Must be ordered in conjunction with the equivalent size R-11 insulation package.

Explosion-Proof Air Conditioner
• **Model 915305:** 15,000 btu
• **Model 915307:** 20,000 btu
Must be ordered in conjunction with the equivalent size R-11 insulation package.

Explosion Proof Wall-mounted Heater / Air Conditioner Package
• **Model 915309:** 6,000 / 15,000 btu
• **Model 915311:** 12,000 / 20,000 btu
Must be ordered in conjunction with the equivalent size R-11 insulation package.

**R-11 Insulation
Models 915601 - 915611**
R-11 insulation in the ceiling, walls, and sump walls for added temperature control and use in conjunction with the air and heat packages

Fire-Rated Models (continued)

Locker Capacity	Explosion- † Proof Heater		Explosion-Proof † Air Conditioner		Heater and † Air Conditioner Package		R-11 Insulation †	
	Model No	Weight lb/kg	Model No	Weight lb/kg	Model No	Weight lb/kg	Model No	Weight lb/kg
2-drum	NA	—	NA	—	NA	—	915601	56/25
4-drum							915603	73/33
6-drum	915301	100/45	915305	200/91	915309	275/125	915605	114/52
9-drum							915607	137/62
12-drum	915303	100/45	915307	200/91	915311	275/125	915609	160/73
16-drum							915611	185/84

Note: Heating and air conditioning packages must be ordered in conjunction with the equivalent size insulation package on fire-rated lockers

† These accessories must be purchased in conjunction with a locker to ensure proper installation and to retain FM approval.

* Shelving is not available on models with explosion relief panels. Shelf package for 2- and 4-drum models (915101) will limit the ability to load locker to full capacity.

** Exterior light package is only available when ordered with the interior light/fan package 915501

Why Do I Need a Safety Can?

Almost every place of business has occasion to use flammable liquids such as fuels, chemicals, and solvents. Whereas these liquids are relatively commonplace, it's important to understand the dangers they may present. For example, one gallon of vaporized gasoline can explode with the same force as twenty sticks of dynamite. Safety containers protect workers by minimizing the risk of accidents and fires when handling hazardous liquids.

Safety cans serve critical functions:

- Reduce the risk of fire and explosion when pouring and storing flammable liquids
- Provide compliance with federal OSHA regulations and fire codes
- Improve efficiency with ease-of-use features which enhance pouring and filling operations

Types of Safety Containers

Safety containers come in a variety of types and sizes for different applications. All are designed to applicable codes and regulations and include safety features for worker protection.

- Type I and Type II steel safety cans
- D.O.T. (Department of Transportation) safety cans
- Polyethylene safety cans
- Laboratory safety cans
- Quick-disconnect safety disposal cans
- Liquid disposal safety cans
- Oily waste cans
- Plunger and bench cans
- Dip, wash, and rinse tanks

Type I and Type II

D.O.T.

Polyethylene

Laboratory

Quick-Disconnect Disposal

Liquid Disposal

Oily Waste

Plunger and Bench

Dip and Wash

Safety Container Compliance

Justrite safety containers meet at least one or more of the following regulations:

- OSHA 1910.106
- National Fire Protection Association (NFPA) Code 30
- UN/D.O.T. 49 CFR parts 100 to 185
- National Fire Code of Canada
- NFPA Fire Code 1
- International Fire Code (IFC)
- California Air Resources Board (CARB) Title 13

Safety Container Approvals

Most safety containers carry independent, third party certification from one or more of the following:

- FM Approvals
- Underwriters Laboratories
- TÜV Technical Inspection Association

Safety expertise since 1906

Justrite offers over 300 models of safety containers to keep workers safe in different industries throughout the world. Learn more about how to choose the proper container for your need and how to properly bond and ground during liquid transfer operations—visit our website and request a free copy of our popular *RedBook™... Your Guide to Handling Flammable Liquids Safely.*

Safety in a Can!

Exclusive, vented Type II AccuFlow™ manifold with a Safe Squeeze® trigger handle provides the fastest smoothest, most controlled pouring. Patented.

Flexible 9-in (229-mm) hose on Type II AccuFlow™ offers targeted pouring into small openings.

Quick-fill port on Type II AccuFlow™ features an ergonomically designed lift lever that opens wide for easy filling.

Extra capacity in all cans accommodates oil additives for two cycle engines.

1/2-in (13-mm) grip lip along bottom supports pouring and resists accidental punctures when placed on uneven surfaces.

Stainless steel flame arrester stops flashback ignition. Long 3-1/2-in (88-mm) length offer safe secure insertion of gas nozzle.

Optional 2-position polypropylene funnel for Type I cans aids in pouring and folds down for compact storage and filling.

Large ID zone permits user labeling to avoid misuse, mishaps with incompatible mixtures, or to identify owner or department.

Comfortable, rounded handle doesn't cut into hand.

Leakproof, positive pressure relief lid automatically vents to prevent rupture or explosion. It is spring-loaded to self-close controlling vapors and spills.

Type II **AccuFlow™**

Type I

Trilingual warning label

Free swinging handle with counter-balanced design leverages the weight of the can against the opening mechanism for easy pouring and carrying.

Reinforcing ribs strengthen walls to resist denting or implosion.

Double lock seams at base and top offer four thicknesses of steel for extra "bumper guard" protection.

24-gauge galvanized steel body and handle finished in an environmentally friendly, tough powder-coat finish resists solvents and stands up to abuse.

100% leak tested

Fully compliant—meets OSHA and NFPA

Swinging, full-fisted rounded handle eases carrying.

Type I Safety Cans

Self-closing, leakproof lid provides safety from spills

Designed with a single spout for filling and pouring, the sealed lid features automatic positive-pressure relief that vents between 3 and 5 psig (0.2 and 0.35 bar) to guard against rupture or explosion.

Made from high-grade coated steel, each can is tested to guarantee 100% leakproof construction. The tough powder-coat finish resists chemicals and stands up to demands of rigorous use. Each Justrite safety can is equipped with a stainless steel flame arrester which dissipates heat to stop flashback ignition. Cans up to 1-quart (1-L) feature a trigger-release handle, while larger capacities have a swinging handle to greatly ease carrying of heavier loads. Large label ID zone on swing-handle cans provides writing space to identify contents, department location, or individual user name.

Certified by FM, UL/ULC, and TÜV, Justrite safety cans also meet OSHA and NFPA requirements, and come with a ten-year warranty.

Type I Safety Can Funnel

Used to pour into smaller openings, the polypropylene funnel attaches to the spout neck of Type I safety cans sized 1-gallon (4 L) and larger. The two-position funnel folds down for when you fill or store the can, and stays up for when you pour. Large rounded bowl provides protection from splashing and spillage. Durable construction holds up to heavy use.

Convenient hinged design allows you to fill the can without removing the funnel.

*Approvals apply to safety can only, not funnel.

Type I Safety Cans—Optional Colors

Differentiate liquids and avoid accidental equipment damage

When working with flammable or combustible liquids, using the wrong fluid could result in equipment damage or lead to disaster. Storing fuels and chemicals in different colored safety cans help identify, organize, and segregate liquids. Colored safety cans have all the same safety benefits and high performance features found in Justrite's popular red Type I cans, including a self-closing, leakproof lid, a flame arrester to stop flashback ignition, and a large identification zone to label contents.

OSHA requires flammables with a flash point below 80°F (27C) be in a red can with yellow band. Typical industry convention is:

- ▶ **Red for Gasoline**
- ▶ **Blue for Kerosene**
- ▶ **Yellow for Diesel**
- ▶ **Green for Oil**

Safety can with 0.5-in (13-mm) diameter funnel makes it easy to pour into small openings.

Safety Can with Funnel Value Package

For added convenience when pouring into small openings, attach a polypropylene funnel to safety cans sized 1-gallon (4-liter) and larger. Unique hinged design folds down to allow filling without taking off the funnel, and stays up when pouring. Cost-saving combination pack includes can with funnel conveniently packed in one carton.

ID zone permits user labeling to avoid misuse, mishaps with incompatible mixtures, or to identify owner or department.

*Approvals apply to safety can only, not funnel.

Independent carrying handle doesn't interfere with pouring mechanism—no worry about accidental spills.

Type II AccuFlow™ Safety Cans

Vented design provides smooth, glug-free liquid flow

Go beyond protection and compliance with the added convenience of AccuFlow™ with Safe-Squeeze® trigger for safe and controlled pouring.

Justrite's patented manifold and proportional flow-control Safe-Squeeze® trigger provides you the means to regulate the flow rate when handling flammable liquids. Fill port with ergonomic lift lever makes filling easy. Flexible 9-in (229-mm) long metal hose spout helps control the pour into small openings.

Made from high-grade coated steel, each can is pressure tested to ensure quality. The tough powder-coat finish resists chemicals and stands up to demands of rigorous use. Stainless steel flame arrester—equipped in all Justrite safety cans—dissipates heat to stop flashback ignition. Sealed lid features automatic positive-pressure relief that vents between 3 and 5 psig (0.2 and 0.35 bar) to protect against explosion. Large label ID zone provides writing space to identify contents, department location, or individual user name. All can sizes have extra capacity for adding two-cycle engine oil or other additives.

Certified by FM, UL/ULC, and TÜV, Justrite safety cans also meet OSHA and NFPA requirements, and come with a ten-year warranty.

Easy-to-fill!

Ergonomic lift lever opens the self-closing spout wide for easy filling. A full-length stainless steel flame arrester dissipates heat and allows deeper, secure insertion of the nozzle when filling.

Type II AccuFlow™ Safety Cans—Optional Colors

Use color safety cans to identify, organize, and segregate liquids

- Fully compliant—meets OSHA and NFPA regulations.
- FM-approved, UL/ULC Listed, and TÜV certified.

When working with flammable or combustible liquids, color-code safety cans to prevent equipment damage as a result of using the wrong fuel. Colored AccuFlow™ safety cans feature a patented manifold for safe, fast, precision pouring. They have all the same safety features as Justrite's red AccuFlow™ cans including a chemically-resistant stainless steel flame arrester to prevent flashback ignition and a self-closing, self-venting lid to control vapors and spills.

OSHA requires flammables with a flash point below 80°F (27C) be in a red can with yellow band. Typical industry convention is:

- ▶ Red for Gasoline
- ▶ Blue for Kerosene
- ▶ Yellow for Diesel
- ▶ Green for Oil

Safe-Squeeze® trigger on AccuFlow™ safety can provides finger tip control when filling up equipment.

Store & secure chemicals . . .
 For security against unauthorized use, store safety cans in lockable Sure-Grip® EX safety cabinets – see page 8.

Use D.O.T. cans when transporting fuel.

Type II AccuFlow™ Transport and Dispensing Cans

Heavy-duty roll-bars protect the spout from damage to prevent dangerous fuel spillage in the event of an accidental fall

- Safe travel mode for over-the-road transport of flammables.
- Usage mode for on-site fuel dispensing—FM-approved.

When traveling on the road to locations that require fuel to power equipment, safely store gasoline or diesel oil in D.O.T. compliant AccuFlow™ safety cans. The cans prevent vapor release and spills during transport by engaging the hold-down bracket with easy-to-grasp tightening screw. Bracket is tethered to the spout and features a fusible link that melts at 165°F (74°C) to prevent dangerous pressure build-up at elevated temperatures.

After fuel transport, disengage bracket to use as a safety can for dispensing and storage. Built-in safety features include internal flame arrester to dissipate heat and prevent flashback ignition, and leakproof, self-closing, auto-venting lid to control vapors and spills. Patented AccuFlow™ manifold includes air displacement vent for smooth, slug-free liquid flow. Easy-to-use flow-control Safe-Squeeze® trigger provides fast, precision pouring.

Complies with United Nations/Department of Transportation regulations. UN marking: 1A1/Y1.2/100.

1. **Travel Mode** - Attach hold down bracket to the top of the lid to prevent vapor release and spills.
2. **Fusible Link** - When in travel mode, if extreme heat or fire conditions exist, fusible link melts to allow lid to vent and relieve pressure to avoid rupture or explosion.
3. **Usage/Fill Mode** - Loosen tethered magnetic bracket and rest on top of can—no parts to lose.

Type I Poly Safety Cans

Chemical-resistant HDPE cans offer safe storage for flammable corrosives

Designed with a durable one-piece body construction, these safety cans stand up to tough acids and heat. Consistent color throughout the HDPE reduces visible scratches and provides color-resistance to reduce chemical leaching, making them suitable for most high purity liquids. The containers resist dents, punctures, and chips to withstand abusive environments. The self-closing cap, pressure-relief mechanism and flame arrester work together to prevent ignition sources from entering without restricting liquid flow in or out of the can. All cans feature stainless steel hardware and flame arrester. FM-approved.

Use smaller capacity safety cans with flame arresters to safely dispense and store chemicals found in laboratories.

Carbon Insert

A patented conductive current-carrying carbon insert is embedded into the rib of containers, completing a ground path between the cover assembly and the flame arrester. When used with a grounding strip, this provides proper grounding and prevents the creation of a static arc during filling or pouring.

Safety Dispensing Cans

With all the benefits of our classic Type I safety cans, these cans come with faucets to make them the choice of lab professionals for safe dispensing of hazardous liquids into small flasks and beakers. Fill spouts have self-closing pressure-relief caps and stainless steel flame arresters. Self-closing faucets provide trouble-free dispensing. Cans fitted with the 08540 faucet offer more controlled dispensing, while faucet 08902 provides a greater flow. All faucets are brass except faucet model number 08919 is stainless steel.

Polyethylene Safety Dispensing Can has superb corrosion protection, and a unique current-carrying carbon insert embedded into the container allows for proper grounding.

Steel & Poly Shelf Cans have a faucet mounted 2-in (51-mm) above the bottom to eliminate the need to lift the cans during dispensing.

Steel Tilt Cans have a faucet on top and the can rests in a sturdy metal cradle. Cradle base measures 13-13/16 x 14-in (351-mm x 356-mm).

All styles are FM-approved.

Need to dispense from a can stored in a safety cabinet?

Squeeze Bottles

Squeeze bottles made of polyethylene with a stainless steel wire, provide safe dispensing of flammable liquids directly on small components or subassemblies with a minimum of over-spray. Squeezing the bottle produces a fine stream of liquid. Stem can be shaped to dispense into hard-to-get areas. Squeeze bottles are intended for daily use only.

Simply squeeze bottle to target liquid directly onto cleaning cloths or parts.

Store partially filled squeeze bottles in a closed container...

Visit our website and search for model no. 27705 mixing tank. It holds nine 16 oz. or seven 32 oz. squeeze bottles.

Description and Capacity	Dimension OD x H	Model No	Ship Wt lb/kg
1 pint (0.5 L) polyethylene squeeze bottle with flexible dispensing tube, translucent	3 x 7.5 in 76 x 191 mm	14009	2/1
1 quart (1 L) polyethylene squeeze bottle with flexible dispensing tube, translucent	3.5 x 9.125 in 89 x 232 mm	14011	

Bottle Jacket

Two-piece bottle jacket provides added protection of a polyethylene cover around chemical glass bottles. Jacket acts as a shock absorber to minimize breakage and spills due to bumps or falls. One-gallon (4-liter) bottle fits into the bottom half of the jacket and lid twists on securely for safe pouring. Translucent color aids in detecting liquid level.

Description and Capacity	Dimension OD x H	Model No	Ship Wt lb/kg
Translucent polyethylene bottle jacket for 1 gallon (4 L) bottles	6 x 14 in 152 x 356 mm	12009	1/1

Self-Closing Containers for Non-flammable Corrosives

Improve safety and ensure containment with secure laboratory containers

Translucent high-density polyethylene resists acids and caustics. The 2- to 5-gallon (7.5- to 19-L) sizes have fixed position on handle, which allows lid to stay open for easy filling. Spring-close cap provides a tight seal. Flame arrester-free spout allows quick pouring of non-flammable corrosives. Oval containers have trigger handle for one-handed pouring and make the most of storage capacity.

1 gallon (4 L) oval polyethylene container with stainless steel hardware	4.625 x 7.625 x 12.75 in 117 x 194 x 324 mm	1.45 in 37 mm	12161	2/1
2 gallon (7.5 L) wide mouth polyethylene container with stainless steel hardware	12 x 14.75 in 305 x 375 mm	3.625 in 92 mm	12762	
2.5 gallon (9.5 L) polyethylene container with stainless steel hardware	10.75 x 15.25 in 273 x 387 mm	1.45 in 37 mm	12260	7/3
5 gallon (19 L) wide mouth polyethylene container with stainless steel hardware	12 x 20 in 305 x 508 mm	3.625 in 92 mm	12765	

Manifold kit provides a convenient, cost effective way to collect waste from multiple HPLC machines.

HPLC Safety Disposal Cans

Quick-disconnect fittings and coalescing carbon filters keep laboratory and personnel safe with a compliant, environmentally-friendly solution to waste collection

Ideal for HPLC waste applications:

- Vapor and fire protection
- Safeguard against accidental spills
- Maximize safety and convenience

Hands-free solvent collection: Solvent flows freely from your process into the container through tubing making it suitable for either pump-fed or gravity-flow HPLC waste methods. Two disconnect fittings, one intake and one vent, eliminate back pressure in liquid flow disposal line and provide controlled handling of vapor.

Durability and safety: Translucent polyethylene container allows quick visual inspection of liquid level. Pouring spout is equipped with a stainless steel flame arrester, which reliably dissipates heat to prevent flashback ignition. Spring-loaded, sealed lid automatically vents to guard against explosion. Control odors with a coalescing/carbon filter.

Quick-Disconnect system: Easy-on, easy-off mechanism offers detachment of the can from the process without leaks, drips or vapor release. Once disconnected, the container is automatically sealed to prevent spills.

Coalescing carbon filter
Optional filters are for use with only round style cans.

Optional manifold

Valved quick-disconnect fittings automatically close when decoupled to prevent vapor or liquid release.

Translucent color lets you check liquid level at a glance.

Oval-style maximizes storage space and features one-handed pouring from narrow 1-7/16-in (36-mm) spout.

Stainless-steel fittings offer PTFE O-rings on standard containers. Also available with EPDM or Viton O-ring seals on customized cans.

Easy-carrying handle with fixed position latch keeps spring loaded cover open for convenient pouring during disposal.

Economically priced polypropylene barbed fittings offer EPDM O-rings.

Large 3-5/8-in (92-mm) opening facilitates controlled pouring into larger vessels for proper hazardous waste disposal. Spout is equipped with a stainless steel flame arrester.

Meets OSHA, NFPA and EPA requirements.

Create custom cans, with up to eight ports, for multiple HPLC units. See our custom-can form online at

* Tubing not supplied with containers.

Coalescing Carbon Filters

Use with HPLC cans to minimize odor, and capture 99% of liquid particulates released in the form of gaseous vapor. Vent filter snaps conveniently into the quick-disconnect fitting. Carbon filter cartridge color indicator beads (top portion) changes from purple to black to indicate when replacement is necessary. Replace the coalescing filter (bottom portion) after three or four carbon filter cycles. Use filters with all 2-gallon (7.5-L), 5-gallon (19-L) and custom-built quick-disconnect cans; not for use with oval style can. Meets EPA 40 CFR 264.173.

Carbon Filter Replacements

Description	Attachment/Use With	Model No	Ship Wt lb/kg
Colormetric/carbon filter 3-Pack replacements	28162 or 28161 Coalescing/carbon filter	28157	2/1

NOTE: When using HPLC carbon filter with FM approved Justrite safety disposal can, the Justrite safety disposal container has not been FM approved or tested in assembly with the HPLC filter attached. However, the container does comply with US OSHA 1910 and NFPA Code 30 requirements, both with and without the HPLC filter. Do not transport safety container while carbon filter is attached.

28157

HPLC PTFE Manifold and Compression Fittings

Enables up to six waste lines (per manifold) from HPLC processes to be fed into a single intake fitting. Safety container with manifold installed is OSHA compliant and meets NFPA Code 30. Use on round containers; not for use on oval style can.

28178

28189

Need a stainless steel manifold?

For containers with stainless steel fittings, use a stainless steel manifold that accepts 4 waste lines. Visit our website and search model no. 28168.

Custom made safety disposal cans . . .

Design your own 2- or 5-gallon can with up to 8 fittings. Visit our website and search on "custom HPLC."

Large opening with cap held open provides convenient filling and pouring.

Liquid Disposal Safety Cans

A better solution for the containment of liquid flammable or corrosive waste

- Durable poly in safety red or translucent white to easily detect liquid level.
- Current-carrying, patented carbon insert embedded in the container allows for proper grounding.

High-density polyethylene (HDPE) disposal cans provide superior chemical resistance and leak protection. Spring-loaded sealed cap, normally closed, automatically vents between 3 and 5 psig (0.2 and 0.35 bar). Stainless steel handle and hardware with latch-catch system hold the cap in the open position for easy filling and pouring. Large-mouth opening features a built-in stainless steel flame arrester to guard against outside ignition. The broad-base design provides stability and resists accidental tip over.

Model numbers 14265 and 14565 with built-in polyethylene fill gauge indicator pops up to warn you that the container is almost full.

Description and Capacity	Dimensions OD x H	Approv/Lstg Regulation	Red Model No	White Model No	Ship Wt lb/kg

Countertop Lab Tray

Polyethylene tray catches drips or spills and keeps counter clean and uncontaminated. Slightly curved edge and ribbed bottom keeps containers from sitting in pooled liquid.

Description	Nominal Dimensions L x D	Model No	Ship Wt lb/kg
Countertop lab tray	31.125 x 18.5 in 791 x 470 mm	29965	4/2

Drain Cans

Safely collect waste liquids from parts washing equipment with a drain can featuring a wide-mouth, 8-7/8-in (225-mm) plated steel funnel that catches drainage with no spills or mess. The funnel has a built-in flame arrester that protects liquid contents from ignition sources. A 3/4-in (19-mm) threaded plug permits disposal of waste liquids into a permanent receptacle. Funnel removes for easy cleaning. Optional drain can cover fits on funnel top to keep dirt out.

Position drain cans under rinse tanks to safely collect used solvents.

Description and Capacity	Dimensions OD x H	Approv/Lstg Regulation	Model No	Ship Wt lb/kg
3 gallon (11 L) steel drain can	11.625 x 12.25 in 295 x 311 mm	FM	10903	7/3

Biohazard Waste Cans

Safe, temporary collection of biological waste

- Meets OSHA 29 CFR1910.1030 for the segregation of infectious waste.
- Perfect for medical facilities and research laboratories.

Safely store contaminated laundry and other regulated waste (except sharps) in sturdy, leakproof steel cans with automatic, self-closing lid. Easy foot pedal operation opens the container to dispose of biohazard waste, and closes upon pedal release to reduce the risk of contamination. Can comes with one biohazard bag that fits around the circumference of the can top—optional model number 05901 includes a roll of 100 liner bags. Optional label kit number 25880 includes three additional biohazard labels for visibility from all sides to comply to California Health and Safety Code 118280.

To lessen disruptive closure noise in quiet environments, use SoundGard™ models which incorporate a muffling pad inside the lid—reducing noise by approximately 200% over standard models.

Foot pedal offers hands-free opening to reduce the risk of contamination.

Description and Capacity	Dimensions OD x H	Approv/Lstg Regulation	White Model No	Red Model No	SoundGard™ White Model No	SoundGard™ Silver Model No	Ship Wt lb/kg
6 gallon (20 L) biohazard can	11.875 x 15.875 in 302 x 403 mm	FM, TÜV	05910	05910R	05915	05914	10/5

100 red liner bags, 11 microns thick	33 x 24 in 838 x 610 mm	—	05901				2/1
Code compliant label kit for California (three labels and instructions)			25880				1/1

Foot pedal provides hands-free opening. When released, cover self-closes to reduce oxygen source and prevent a fire from starting.

Oily Waste Cans

Dispose of oil-soaked rags and prevent fires caused by stray sparks or spontaneous combustion

Rags and cloths soaked with solvents, thinners, linseed oil, combustible adhesives and other flammable liquids present a serious fire risk when improperly discarded. Lid opens to no more than 60 degrees and stays closed when not in use, isolating contents from fire sources and limiting oxygen to virtually eliminate the risk of spontaneous combustion. Round construction and elevated base allow circulation of air around can to disperse heat and reduce moisture build-up and rusting. Durable steel construction with a powder-coat finish provides chemical resistance. Approved by FM, UL, and TÜV. All cans carry a ten-year warranty.

1. Swinging carry handle for portability
2. Warning label with pictographs reduces miscommunication
3. Leakproof design with elevated base provides air circulation to reduce rusting and disperses heat for added safety

Lid opens no more than a 60° angle as required by UL.

21 gallon (80 L) oily waste can	18.375 x 23.438 in 467 x 595 mm		09700	09710	22/10

*Hand-operated models do not have TÜV certification.

Oily Waste Cans—Optional Colors

Additional colors offer versatile waste collection

- Standard oily waste cans in yellow help differentiate waste materials.
- SoundGard™ style in silver or red lessens noise closure for quiet-working settings.

Use color identification to help segregate different types of waste rags and wipes or to differentiate multiple work shifts or departments. OSHA compliant colored oily waste cans protect your worksite from fires that can start from spontaneous combustion, sparks, or careless use of smoking materials. Foot-operated models offer hands-free opening, and gravity-close to reduce oxygen and prevent fire. Raised base allows air circulation to reduce moisture build-up and rusting, and disperses heat for added safety. Leakproof, durable steel construction with powder-coat finish for long life—backed by a ten-year warranty.

To lessen disruptive closure noise and provide a more comfortable working environment, use SoundGard™ models which incorporate a muffling pad inside the lid—reducing noise by approximately 200% over standard models.

Use quiet-closing SoundGard™ oily waste cans in environments where others are working close by.

Sound-muffling SoundGard™ lid significantly reduces noise closure.

High-visibility red finish provides increased awareness in the workplace.

Safety Drum Covers

Convert open-top 30- or 55-gallon (110- or 200-L) steel drums into safe waste receptacles

- Keep facilities protected against fires from combustible trash.
- FM-approved and TÜV certified.

Self-closing drum cover turns a drum into a fire-safe receptacle for combustible waste. Simply use a screwdriver and wrench to attach the cover to a drum. For added safety, a replaceable fusible-link assembly melts at 165°F (74°C) to automatically allow spring-loaded cover to slam shut if there is a fire in the drum.

Durable steel construction with powder-coat finish provides excellent chemical resistance. Fifty-five gallon (200-L) size fits drums from 22-1/2-in to 22-3/4-in (565- to 578-mm) in diameter. Thirty-gallon (110-L) size fits drums nominally 18-3/8-in (467-mm) in diameter.

Note: Drum and cover purchased separately.

Manual latching lid with gasket and vent

Self-closing lid with gasket and vent

Manual latching lid with gasket, vent, and easy-access port

Safety Drum Lids with Vapor Control

Control hazardous vapors and reduce fire risks

- Meets EPA, NESAM, and OSHA requirements.
- Independently fire tested and approved by FM Approvals.

Control vapor and VOC emissions when disposing solvent-soaked rags with easy-to-attach, durable steel lids—require only a screwdriver and wrench to install on open-head 55-gallon (200-L) steel drums. All lids feature a gasket and vent to meet the National Emissions Standard for Aerospace Manufacturing (NESAM) 60 FR 45956 subpart GG 63.741. Safety vent relieves pressure build-up between 3 and 5 psig (0.2 and 0.35 bar) at elevated temperatures.

Model No. 26752 features a manual latching lid which accepts an optional padlock for security. **Model No. 26753** has a self-latching lid with a spring-loaded, rotary latch mechanism. It offers a greater degree of safety because when released, it automatically closes via gravity and then automatically latches to prevent the drum from being left open by mistake—eliminating the chance for oxygen to enter and start a fire. **Vapor-Trap™ model No. 26754** features a manual latching lid that accepts a padlock to minimize access to contents. An easy-access port allows quick discards of small containers such as used lubricants, motor oils and additives, and non-reusable cosmetics, skin products, and demonstration colognes used in retail settings.

Cease-Fire® Waste Receptacles

The safe answer to waste paper and other solvent-free combustibles accumulation

- Brushed aluminum head models for easy cleaning and corrosion resistance.
- Durable steel head models with red powder-coat paint for abusive conditions.

Justrite's Cease-Fire® Waste Receptacles are specially contoured to direct smoke and gas from any fire inside the container, back into the combustion area, cutting off the air supply and extinguishing flames in seconds. Cease-Fire® receptacles provide around-the-clock protection against trash fires. Drum bodies are heavy gauge steel with a rust preventative interior coating. Drums should be filled ¾ full only. Most models carry both a UL Listing and FM-approval.

Unique contoured head smothers flames fast.

Position Cease-Fire® receptacles throughout your facility to keep it clean and protected against trash fires.

Three colors complement many settings. Suitable for:

- Industrial facilities
- Lobbies and entryways
- Hotels and restaurants
- Office buildings
- Lunchrooms
- Schools
- Hospitals
- Retail locations

Safety Plunger Cans

Moisten cleaning cloths quickly and easily—smart-pump brings more liquid to the top and requires less time between refills

- Rugged 24-gauge steel cans with powder-coat finish for chemical resistance.
- High-density polyethylene container option for greater corrosion resistance.
- Approved by FM Approvals and TÜV.

Dispense flammable liquids and solvents safely, without waste or exposure. Made of chemically resistant Ryton® and brass, the pump base is designed to leave less liquid in the bottom before having to refill.

Pushing down on the pump assembly fills the upper perforated pan with liquid. Surplus liquid drains safely back into reservoir. The perforated upper pan serves as a flame arrester. Top rim has molded edge protector for smooth, trouble-free moistening.

Perforated dasher dissipates heat.

Efficiently wet wipes with a simple pump action.

See how it works!
 Visit our website and search "plunger can video" or subscribe to our YouTube channel to be notified each time new content is added.

Safety Bench Cans

Simple downward push soaks parts in solvent for easy cleaning

- Durable 24-gauge steel with powder-coat finish for chemical resistance.
- Flash-arresting plated steel dasher plate for safety.
- All styles FM-approved—most certified by TÜV.

Bench cans offer an easy means of cleaning small parts in solvent. Simply place work on spring-loaded, perforated dasher plate, press down and agitate, then release to return dasher to drain position. Plated steel dasher also works as an effective flame arrester to reduce the risk of fire flashback. Hinged cover minimizes evaporation losses and protected rim reduces the possibility of hand injury. Model number 10471 swab pail functions like a bench can for sponging operations—includes a bail handle for easy portability. Model number 09400 bench top solvent can with spring-loaded lid self-closes after each use for vapor retention to meet the National Emissions Standard for Aerospace Manufacturing (NESAM) and EPA regulations—accepts long cotton tipped applicators.

Clean small parts by pushing down dasher plate and agitate in cleaning solvent.

Safety Dispenser Cans

Safe, convenient way to release small amounts of liquid

Dispensing cans permit easy, one-hand dispensing of liquids directly onto work surface or into lab beaker. Leakproof, self-closing, brass dispenser valve minimizes spills and controls excess. FM-approved brass valves are ideal for use with flammables. Textured, high-density polyethylene body provides a firm grip.

14010 / 14004

Description and Capacity	Dimension OD x H	Spout Opening ID	Approv/Lstg Regulation	Model No	Ship Wt lb/kg

1 quart (1 L) polyethylene dispenser can, translucent		14012			

Clean small parts by immersing basket into solvent.

Safety Cleaning Tanks

Dip tanks and wash tanks are a safe, portable solution to parts cleaning

- Dip tanks for singular, larger piece parts.
- Wash tanks include basket for cleaning multiple small parts.
- Tanks and baskets are made from sturdy, 24-gauge coated steel with powder-coat finish for chemical resistance.

Use for cleaning parts and subassemblies where the volume of work does not warrant a larger rinse tank. Portable size accommodates changing production requirements. Tank cover stays open for convenient access; self-closing mechanism and fusible link melts at 165°F (74°C) to snap the cover shut in case of fire. Models with a high-density polyethylene liner offer outstanding chemical resistance to permit use with harsh, corrosive chemicals. Liner is removable and easy-to-clean.

Dip tank capacities range from 1-gallon (4-liter) to 8-gallon (30-liter) to accommodate a variety of part sizes. Wash tanks are sized exactly like the dip tanks, and they include a parts basket to facilitate washing multiple small parts quickly. Basket handle reduces hand contact with the cleaning solvent. Because liquid volume is displaced when the basket is lowered into the wash tank, stated capacity is lower than the dip tank counterpart. After cleaning operation is complete, lift basket to tank top and rest side handles into inside indents to allow solvent to drain before removal. Keep tanks closed when not in use.

Description and Capacity	Dimension OD x H	Approv/Lstg Regulation	Red Model No	Yellow Model No	Ship Wt lb/kg	
Dip Tanks						
1 gallon (4 L) steel dip tank	9.375 x 5.5 in (238 x 140 mm)	FM, TÜV	27601	27611	4/2

3.5 gallon (13 L) steel dip tank	11.375 x 11.25 in (289 x 286 mm)		27603	27613	8/4	
5 gallon (19 L) steel dip tank	13.75 x 13 in (349 x 330 mm)		27605	27606	11/5	
5 gallon (19 L) steel dip tank with HDPE liner			27615	27616		
8 gallon (30 L) steel dip tank	15.625 x 14.25 in (397 x 362 mm)		27608	27618	13/6	
Wash Tanks						
1 gallon (4 L) steel wash tank with basket	9.375 x 10 in (238 x 254 mm)		FM, TÜV	27711	27811	7/3
2 gallon (8 L) steel wash tank with basket	11.375 x 11.25 in (289 x 286 mm)	27712		27812	10/4	
3.5 gallon (13 L) steel wash tank with basket	13.75 x 13 in (349 x 330 mm)	27713		27813	12/6	
3.5 gallon (13 L) steel wash tank with HDPE liner and basket		27723		27724	13/6	
6 gallon (23 L) steel wash tank with basket	15.625 x 14.25 in (397 x 362 mm)	27716		27816	15/7	

Accessory parts basket simplifies cleaning small parts.

Note: Tank sizes for dip and wash tanks are the exact same; however, liquid capacity differs when using a parts basket because the liquid volume is displaced by the basket.

Safety Rinse Tanks

Easily clean large parts with big capacity rinse tanks

- Generously sized to immerse parts 16-in deep x 35-in wide (406 x 889-mm).
- Durable 18-gauge (1-mm) steel with powder-coat finish for excellent chemical resistance.
- All chambers feature a 3/4-in (19-mm) drain plug for easy solvent replacement.

Floor standing rinse tanks are supported on a sturdy stand and offer a convenient working height of 32-3/4-in (832-mm). Self-closing cover is opened by stepping on a long foot-operated treadle, leaving both hands free to position and clean parts. When treadle is released, an adjustable-rate pneumatic cylinder prevents the cover from slamming shut to protect against hand injury.

Use **benchtop style rinse tanks** for easy point-of-use access on workbenches or counters. Lift-and-latch style cover includes a fusible link that melts at 165°F (74°C) to automatically close the cover under fire conditions.

Twin chamber rinse tanks are evenly divided between right and left sections to permit cleaning heavy grime on one side, and a using a clean solvent rinse on the other side. They feature the same protective, self-closing cover as found on the floor standing models.

Stepping on foot treadle opens the rinse tank cover, leaving hands free for cleaning.

Ideal for any establishment—clean grounds help maintain your business image.

Original Smoker's Cease Fire® Cigarette-Butt Receptacles

Keep entrances clean from cigarette litter—fire tested and approved for safety by FM Approvals

Made of flame-retardant and sturdy polyethylene, this low maintenance smoker's friend won't rust, dent or crack. Innovative self-extinguishing design safely collects unsightly cigarette litter and reduces the risk of fire. Tie-down notches offer security and greater stability under severe weather conditions.

Units include a galvanized steel bucket that collects thousands of butts. For maximum cleaning convenience, use optional disposable bucket liners. Once bucket is full, simply twist-tie closed and throw away!

Personal Smoker's Cease-Fire® features a compact design measuring 11-in diameter by 30-in high (762 x 279-mm) for use alongside chairs, poolside loungers, and on small patios. It has the same self-extinguishing design as the larger Original Smoker's Cease-Fire® and includes a small, 1-gallon (4-liter) pail suitable for lighter smoking traffic areas.

Large covered head dissipates heat and keeps rain out

A 1-1/2-in (38-mm) opening easily accepts butts and discourages waste from being dropped in

Extinguishing spot

Molded-in graphics easily identify opening for cigarette butt disposal

Large internal neck cavity minimizes clogging

Broad 16-1/2-in (419-mm) base for stability

Patent: US 6,626,322 B1

Attractive design in five colors hides cigarette litter

Elite™ Smoker's Cease Fire® Cigarette-Butt Receptacles

Attractive contemporary styling with fire safe construction approved by FM Approvals

Hide unsightly cigarette butts and reduce the risk of fire. Polyethylene construction features a large stainless steel snuffer that discourages use of top to put out cigarette. Keeps unit clean from stains. A steel pail inside removes for easy cleaning and can be fitted with optional bucket liner. Compact carton saves on shipping costs. Optional cable kit available for severe weather or security.

Optional burn resistant aluminum/poly liner makes it easy to clean. Once liner is full, simply remove bag liner, close it off with included twist-tie, and discard. Large steel pail is included.

Optional cable kit & padlock

Heavy Duty Butt Cans

Position slim-styled smoking receptacles with self-extinguishing design near entryways to encourage proper cigarette disposal. Fire-safe galvanized steel two-piece base with neck features a tough powder coat finish to resist rust and a polyethylene top to keep out rain. To empty, untwist compression nut where neck meets the base—no separate screws to lose. Use in outdoor industrial settings such as factories, backdoor entrances, alleyways, loading docks, and service and repair shops.

Proper bonding and grounding techniques prevent static discharge and the potential for fire.

Safety Drum Funnels

Prevent spills when transferring flammable solvents, thinners, oils or paint wastes

- Wide-mouth opening with hinged, stay-open lid.
- Self-closing lid in case of fire.
- Galvanized steel with durable exterior epoxy powder-coat finish.

Safely transfer flammable liquids into a 30- or 55-gallon (110- or 200-L) drum using these 2.6-gallon (9.8-L) capacity safety funnels that fit into a 2-in (51-mm) bung. Wide 10-3/4-in (273-mm) mouth handles rapid pouring without spills. Durable steel funnels feature a self-closing cover with a fusible link that melts at 165°F (74°C) to automatically close in case of a fire. Model numbers 08207 and 08205 include a built-in brass flame arrester that absorbs and dissipates heat preventing any external ignition source from reaching the drum's content. Both models handle flammable waste safely—model number 08205 with a longer flame arrester provides greater liquid flow. For collection of viscous flammables or non-flammable liquids, use model number 08208 fitted with a long open-ended brass tube to direct liquid flow. Heavy-duty 18-gauge (1-mm thick) galvanized steel construction with electrostatically applied epoxy powder-coat offers excellent durability and chemical resistance. Lid in closed position reduces vapors and accepts a lock (not included) to prevent unauthorized access.

Safety Drum Funnel with Tip-Over Protection System

Use model number 08203 to prevent spillage from drum tip-over accidents or for earthquake-prone areas. It offers the same protection as drum funnel no. 08207 above, with the addition of an integral ball valve that self-closes to minimize vapor emissions—and seals the drum closed to prevent dangerous content spillage. System includes a brass vent to provide pressure and vacuum relief for protection against rupture or explosion. Easy to operate—install vent with bung adaptor in the 3/4-in (19-mm) bung and brass unit with handle into the 2-in (51-mm) bung. Fill funnel with liquid, close cover and latch, then depress handle to manually open ball valve and release liquid into drum. Releasing the handle automatically closes the valve to safely seal the drum.

FM Approved. EPA and OSHA compliant.

Use color coding to safely segregate incompatible waste.

Pushing down handle opens ball valve to release liquid into drum.

Need a funnel to fit small steel pails?

For safe liquid collection into 5-gallon (19-liter) pails, visit our website and search model nos. 08201 and 08202.

Safety Drum Vents and Fill Vents

Prevent dangerous failure of drums storing flammables by using safety vents

- Relieve pressure build-up due to heat.
- Provide vacuum relief during sudden cooling or liquid drain-off.
- Fits either 2-in (51-mm) or 3/4-in (19-mm) bung opening on 30- or 55-gal (110- or 200-L) drums.

Provide emergency pressure venting in the event of a fire to avoid drum failure and catastrophic consequences. All safety drum vents automatically relieve pressure between 3 and 8 psi (30 to 55kPa) and include a flame arrester to absorb and safely dissipate heat. Valve within the vent is tested to allow 61 cubic inch (1-L) of water through a 3/8-in (9.5-mm) pipe nipple in less than 6 seconds for vacuum relief during drum dispensing operations. Vacuum relief permits smooth liquid flow and prevents possible drum collapse and leakage. Vacuum relief is automatic on vertically-installed vents and manual on horizontally-installed vents.

Justrite's Aerovent™ fits a 2-in (51-mm) vertically-stored drum and has the same protection features of auto venting, auto vacuum relief, and a flame arrester as found in Justrite's traditional safety vents—with the addition of a replaceable filter to control fugitive emissions. Brass body with an activated carbon filter adsorbs vapors and captures VOCs to keep them from escaping into the atmosphere during the exhale cycle. Use replacement filters when filter reaches full capacity or odors are present (approximately 90-120 days).

Safety fill vents and funnels fit the 2-in (51-mm) bung on a vertically-stored drum. The brass vent provides automatic pressure and vacuum relief, and includes a brass cap with safety chain tethered to the vent to prevent misplacement or loss. Remove cap during drum filling operations. Model no. 08211 includes a 9-in (229-mm) wide polyethylene funnel to facilitate solvent waste disposal and reduce spillage. Keep vent capped in closed position after filling operations to prevent flammable vapor from escaping. Six-inch (152-mm) flame arrester safely dissipates heat and prevents flashback from external ignition sources.

Avoid dangerous pressure build-up by installing safety vents in horizontally- or vertically-stored drums of flammable liquids.

Safety Drum Faucets

Safe and easy dispensing from horizontal drums

Simply place these faucets on your drum for leakproof dispensing of flammable liquids. Faucets feature an internal flame arrester that prevents flashback of fire into the drum for added safety. Brass construction with a polytetrafluoroethylene (PTFE) seal ensures excellent chemical resistance. Take the worry out of awkward spout position with adjustable models 08910 and 08916. They feature a coupling nut that provides rotation of the spout downward after the faucet is threaded in place. Use Model 08552 for viscous noncorrosive flammables such as adhesives, paint or heavy oils above 2000 SSU (about 30W oil).

Faucets are FM Approved.

Drum Siphon Adaptor

Safely drain a horizontally stored drum down to a few ounces to save on costs associated with removal of hazardous liquids

Avoid dangerous tipping or rolling a drum to drain its contents. Unique siphon action of the drum siphon adaptor empties residual solvents from two to three gallons (7.5- to 11-L) down to only a few remaining ounces. Solid cast brass adaptor withstands heavy use with compatible liquids. Adaptor fits into a 3/4-in (19-mm) drum bung and features an adjustable collar to accommodate bungs in various positions for maximum draining. Attach a 3/4-in (19-mm) safety drum faucet on the opposite end for safe, trouble-free dispensing.

Description	Model No	Ship Wt lb/kg
Brass drum siphon adaptor for 0.75 in NPT/NPS (DN20) bung	08311	2/1
Brass adaptor no. 08311 and brass self-closing faucet no. 08902	08308	4/2

Antistatic Wires

Reduce fire risks by preventing sparks from static electricity

Use antistatic wires to prevent sparks from static electricity generated by movement and flow of flammable liquids. During waste collection operations, use one antistatic wire to bond from a safety container to a receiving vessel such as a funnel, then properly ground by attaching a second antistatic wire to the drum and then to an earth ground. Standard wire lengths are 3-foot (1-M) and 10-foot (3-M); for longer reach, use several wires with ¼-in (6-mm) terminal ends. Custom length assemblies are available in 3-foot (1-M) increments.

Ground wire connects drum to earth ground

Bond between containers

Bond dispensing can to receiving container, then ground receiving container to a water pipe or ground strip.

0.25 in (6 mm) terminal

For custom assemblies, call Customer Service.

Drum Fill Gauges

Install fill gauge in a ¾-in (19-mm) drum bung to avoid overfilling and dangerous liquid overflow

Polyethylene pop-up gauge provides an economical way to prevent overfilling vertically-stored drums during waste disposal operations. Indicator gauge pops-up to warn when drum is almost full.

Zinc-plated, cast-iron gauge for horizontally-stored drums permits checking of liquid level at a glance. Unit features heavy-duty glass tubing protected by a chrome-plated housing for use with non-viscous liquids. Buna-N seals are suitable for petroleum products.

Description	Dimensions	NPT/NPS	Model No	Ship Wt lb/kg
Vertical drum polyethylene pop-up gauge	0.75 in dia. - 5 in L (127 mm)	0.75 in (DN20)	08530	2/1
Vertical drum polyethylene pop-up gauge	0.75 in dia. - 11 in L (279 mm)		08531	
Horizontal drum cast-iron fill gauge	0.75 in dia. - 11.25 in L (286 mm)		08532*	
Horizontal drum cast-iron fill gauge No. 08532 with self-closing faucet No. 08902			08533	4/2

* Can be used with drum siphon adapter No. 08311 or No. 08308 (see page 72).

08530

08532

Heavy-duty drum wrench opens tight drum bungs with ease.

Drum Accessories

Add convenience and safety when handling and dispensing from drums

Drum Top Accessories

Drum Bung Wrench - Made of rugged, non-sparking corrosion resistant brass, this drum wrench opens 2-in (51-mm) and ¾-in (19-mm) bung styles commonly used on drums. Handle design protects the hand.

08805

Drum Locks - Made of corrosion resistant, non-sparking zinc die cast, drum locks easily install around the drum bung flange over the original bung. Since there is no contact with the drum contents, the potential for content contamination is eliminated—making them suitable for chemical and food processing applications. Locks install in seconds to secure contents and reduce theft, pilfering, and sabotage.

Drum Lifter - Tong-style lifter with 1,000-lbs (454-kgs) capacity grips the drum chime to allow a heavy 55-gallon (200-L) drum to be elevated and moved with a forklift truck.

Why Do I Need Spill Containment?

Hazardous leaks and spills are a relentless challenge. Slippery floors indoors can lead to a fall accident with associated costs anywhere from \$5,000 to \$40,000 for more severe lost time accidents. In addition to the damaging effects to our environment, EPA fines for contamination of our outdoors can be staggering, into the tens and hundreds of thousands of dollars. By using Justrite spill control products, accidents and costly fines can be easily avoided.

Good spill containment practices offer these benefits:

- Keeps personnel and the environment protected
- Supports corporate and government sustainability initiatives
- Saves money by reclaiming spilled liquids
- Enhances your safety program, raises employee awareness
- Improves your company image—shows your commitment to employees and the environment
- Increases efficiencies by keeping materials organized
- Complies to laws and avoids fines—meets or supports EPA and SPCC (Spill Prevention, Control, and Countermeasure) regulations

Flexible containment

Flexible containment products are typically made of durable PVC coated fabric which folds down and stores compactly for easy portability and emergency use. They can be used indoors and out and capture anything from small leaks and drips to large-scale spills up to 5,860 gallons (22,187 liters). Patented Rigid-Lock QuickBerms® feature vehicle drive-in, drive-out capability, and offer fast, one-piece set up.

Water-Filled Boom Diverters

Water-Filled Drain Covers

Structured containment

Structured containment products are typically used indoors to safely store drums of hazardous liquids. For outdoor use, weather-resistant sheds equipped with leakproof sumps safely store drums or IBC's. Most are constructed of rigid, durable EcoPolyBlend™ recycled content, making them twice as good for the environment. Sump capacities as high as 372 gallons (1,408 liters) prevent groundwater contamination—and recycled content saves on oil, electricity, and landfill space.

Rigid-Lock design provides large-scale spill protection with optimum floor space for unobstructed drive-through capability.

Rigid-Lock QuickBerm® Plus NEW

Heavy-duty construction provides long-term spill containment for vehicles, heavy equipment, tankers, and more

- *Single-piece construction – patented Rigid-Lock wall-support system integral to berm provides unobstructed work space.*
- *Quick and easy setup – no assembly required.*
- *Durable EnGuard™ VI modified PVC coated fabric withstands long-term UV exposure – great for outdoor use.*

The QuickBerm Plus® offers superior protection and chemical resistance against the harshest of liquids, including petroleum, oils, greases, and most acids. Exhibits three times greater resistance against punctures and abrasion, resulting in longer wear over other popular QuickBerm® products – excellent for heavy vehicle traffic.

Unlike floating-wall type berms that are susceptible to wall collapse and containment failure, the patented Rigid-Lock stainless steel brace supports walls at full 90° locked position for secure, leakproof containment. A simple push on the walls unlocks the support and lays the wall down for drive-through capability from any angle.

The built-in Rigid-Lock wall supports maximize usable space inside the berm and greatly reduce any tripping hazard on the berm perimeter. Reinforced CriticalCorner™ design with wraparound diagonal radio frequency (RF) welds offer exceptionally strong structural integrity to prevent seam leaks, provide fluid-tight reliability, and extend berm life expectancy. Finished hem edge on top of sidewall prevents fraying and adds strength. Each support includes an integrated hole for anchoring the berm under high wind conditions. Anchor stakes not included.

See page 85 for tarps, ground mats, track mats, or track runners to provide extra protection against rocky surfaces or heavy in-out traffic use.

Helps comply with EPA for containment and spill prevention (SPCC).

Unmatched structural integrity

Patented Rigid-Lock Mechanism

Critical-Corner™ Construction

Sets up to a 90° locked position. Integrated holes in hub permit easy anchoring.

Reinforced, wraparound design prevents seam leaks for fluid-tight reliability.

Supports fold down and lie flat to allow large vehicles to drive in from any angle. Highly chemical-resistant fabric offers exceptional abrasion and puncture resistance.

Note (1): For exterior dimension, add 8-in (203-mm) to width and length to account for support and hub.
 Note (2): When selecting a berm size, allow 12-in (305-mm) at entry or exit for lowering and raising the wall.

Ask about custom berm sizes

Rigid-Lock QuickBerm® **NEW**

Safe, drive-in spill containment for drums, IBC totes, and tanks

- Single-piece construction – patented Rigid-Lock wall-support system integral to berm provides unobstructed work space.
- Quick and easy setup – no assembly required.
- Durable EnGuard™ V modified PVC coated fabric withstands long-term UV exposure – great for outdoor use.

Ergonomic design provides 100% inside berm accessibility with an unobstructed side-to-side floor space for vehicle tires, foot traffic, and cleaning. The patented Rigid-Lock wall-support design protects personnel against trips and falls when walking along the outside perimeter. Built-in stainless steel wall supports lock the sidewalls in a 12-in (305-mm) high, 90° vertical position. The Rigid-Lock QuickBerm® offers immediate, secure deployment and no-worry, spill-readiness.

Like the QuickBerm® Plus the standard QuickBerm® withstands a broad range of chemicals including petroleum, oils, grease, and most acids—durable enough for extended wear. Exceptionally strong structural integrity includes a reinforced CriticalCorner™ design featuring wraparound diagonal radio frequency welds to prevent billowing, unwrapping, or sagging of the corners during full containment for fluid-tight reliability. Walls include a 1-in (25-mm) fray-resistant finished hem along the top rim for added wall strength and integrity. Each support includes an integrated hole for anchoring the berm under high wind conditions. Anchoring stakes not included. Sidewalls lower quickly for easy drive-in and out. Portable design folds down quickly for storage and transport.

Helps comply with EPA for containment and spill prevention (SPCC).

Note: the difference between the QuickBerm® Plus (page 76) and the standard Rigid-Lock QuickBerm® is the durability of the PVC-coated fabric. The Plus version with EnGuard™ VI material is thicker and more durable for more frequent drive-in or -out applications. The standard QuickBerm® constructed of EnGuard™ V material is better suited for infrequent drive-in or -out scenarios, pedestrian traffic, and for placing heavy materials within the working space.

See page 85 for tarps, ground mats, track mats, or track runners to provide extra protection against rocky surfaces or heavy in-out traffic use.

Portable, drive-in containment berms can be used anywhere, indoors or out, for storage of drums, tanks, or leaky equipment.

No assembly needed – saves time, ready in minutes!

Unfold berm, exposing supports in flat position.

A simple tug locks supports in upright position.

Fully deployed for quick spill readiness!

Ask about custom berm sizes

Unmatched structural integrity

Patented Rigid-Lock Mechanism

Sets up to a 90° locked position. Integrated holes in hub permit easy anchoring.

Stainless steel support is encased in protective hub to withstand vehicle traffic.

Critical-Corner™ Construction

Reinforced, wraparound design prevents seam leaks for fluid-tight reliability.

Quickly capture spills from damaged saddle tanks, minimizing ground contamination and associated clean-up costs.

Rigid-Lock QuickBerm® Lite NEW

Portable, versatile containment berm deploys quickly for emergency spill response

Leakproof, tough EnGuard™ I PVC coated fabric provides broad UV and chemical resistance that withstands repeated usage. The patented Rigid-Lock wall supports maximize usable space inside the berm and greatly reduce any tripping hazard around the perimeter. Stainless steel braces support wall at 90° locked position for secure, leakproof containment.

Lightweight berm folds down easily to a small size for storage in trucks, emergency vehicles, and spill kits. Add optional grates to help reduce contact with contaminated liquids by personnel or equipment.

Helps comply with EPA for containment and spill prevention (SPCC).

Applications:

- Saddle tank ruptures
- Personnel and small equipment decontamination
- Fuel tank overspill protection
- Hydraulic leaks and breaks
- Transformer storage
- Leaky containers, machinery, and piping
- Overfills from aircraft or locomotive refueling
- Truck, auto, and forklift battery storage
- Spill kit addition

Use as an emergency decontamination station with optional grating.

Decon QuickBerm® NEW

Portable multi-zone decon stations help prevent environmental contamination

- *Single-piece construction—patented inside wall-support system forms watertight wash down zones.*
- *Quick and easy setup—no assembly required.*

For emergency deployment, these multi-stage berms with patented interior walls create wash down zones that safely capture and contain contaminated solutions. Select from two-, three-, or four-zone models. Watertight, lightweight PVC coated fabric provides wide range of chemical resistance. The 8-inch (203-mm) walls allow for easy entry and exit of the compartments. One ¾-in GHT drain fitting per zone. Order optional grates to keep personnel above liquid.

28572

Quick-deployment Decon QuickBerm® used by first responders for emergency decontamination of personnel.

Individual, leakproof zones prevent contaminated fluid from traveling from one zone to another.

Drip Pads **NEW**

Capture small oil leaks and drips before they contaminate the ground or create unsafe work surfaces

- Lightweight, flexible, and portable – great for containing small oil drips from leaky vehicles, industrial machinery equipment, hydraulic lines, pipes, and drums.
- Made from UV- and chemical-resistant modified PVC.
- Patented design feature includes a coated mesh outer layer to trap coarse debris.

These drip pads feature replaceable, oil-only sorbent within a welded leakproof barrier. Rated for drive over applications, pads include brass grommets in opposing corners for anchoring. Anchoring stakes not included. Pads come in two sizes; extended model is weighted to keep it down in high winds. Outer shell is reusable with optional refill sorbent packs.

Helps comply with EPA for spill prevention (SPCC).

Position drip pad in tight spaces between machinery to capture oily leaks.

Washdown QuickBerm® **NEW**

Portable drive-through station captures contaminated water from vehicle and construction equipment wash down

Durable vinyl coated material reinforced with radio frequency-welded, high visibility yellow runway strips that withstand drive-thru traffic, including backhoes and skid steers. Removable 4-in (102-mm) diameter foam inserts support sidewalls while 2-in H x 8-in W (51- x 203-mm) planks (not included) slide into pockets to keep end walls elevated preventing wastewater from escaping during drive-over. Simply remove foam inserts to fold material for quick and compact storage. Two 1-in NPT fittings on each side of the berm for drainage. Brass grommets around perimeter provide the ability to securely anchor berm during use. Anchor stakes not included.

Helps comply with EPA for stormwater regulations.

Wash down dirty equipment and recapture water for reclamation.

Note: For exterior dimension, add 8-in (203-mm) to width and 36-in (914-mm) length.

Drain fitting offers an easy way to redirect liquids.

Drive over endwalls without losing liquids.

Suspended funneling design diverts damaging water from ceiling leaks to protect personnel, inventory, and equipment.

Ceiling Leak Diverters **NEW**

Redirect roof or pipe leaks to prevent water damage

- Available with high strength magnets for steel rafter attachment, or grommets for bungee or zip tie attachment.
- Constructed with cinched corners for quick and easy installation.

Durable, puncture resistant, and watertight PVC-coated yellow fabric is designed to channel overhead pipe and ceiling leaks to containers or floor drains. Diverters help provide a fast and economical way to protect your personnel, equipment, and inventory. Simply connect to a standard garden hose to drain water safely away. Flow rate of 3.3 gal/min (12.5 L/min).

Mini-Berm Flex Tray **NEW**

Compact, portable spill control for harsh and hazardous chemicals

Safe and reliable for tabletop parts cleaning and fluid transfer operations involving petroleum products and acids, the Mini-Berm Flex Tray is made from a robust modified PVC-coated fabric. It features rigid corner supports and sturdy foam walls. Each berm comes with a 1-in NPT drain fitting. Simply attach hose and transfer fluids for disposal. Easy to fold and store; utility strap included.

Helps comply with EPA for containment and spill prevention (SPCC).

Pop-Up Pools **NEW**

Economical emergency spill containment - simply unfold, shake from foam ring top, and place under leaking equipment

- *Folds tightly and stows easily.*
- *Embedded foam ring top raises containment wall as fluid level increases.*

Use these space-saving and lightweight pools to contain spills from punctured saddle tanks, or leaking drums, hydraulic lines, pipes, and machinery. The durable vinyl fabric is 20% heavier than other models on the market, providing increased abrasion resistance and more reliable seam adhesions. Yellow color provides visibility and easy identification.

Helps comply with EPA for containment and spill prevention (SPCC).

Space-saving design for emergency spill control from ruptured saddle tanks.

Free survey helps you address environmental concerns . . .

Not sure which spill control solution is right for you? Justrite's free STUD-E™ survey can ensure proper protection and compliance—visit [www.justrite.com](#) to learn more and sign-up.

Use for temporary spill containment for leaky drums.

Folds to a compact size for storage in tight spaces.

Water-Filled Boom Diverters **NEW**

Temporarily divert and control fluid for easy cleanup or recovery

Use the water filled booms in storm water management, portable washdown/ pressure washing diversion, spill diversion, and equipment and personnel decontamination. Flexible PVC film construction conforms to uneven surfaces such as asphalt or concrete to form a diversionary barrier away from storm drains or as a holding area for wet vacuum operations. Features easy-open push plug for filling with standard water hose.

Helps comply with EPA for stormwater regulations.

Redirect liquids away from work areas and storm drains.

Water-Filled Drain Covers **NEW**

Ensure regulatory compliance and prevent run-off pollutants from entering stormwater drains

Deploy cover as a preventative measure to seal drains before washdowns, maintenance, or other cleanup tasks that may allow contaminants into nearby water systems. Features easy-open push plug for filling with standard water hose. Order a cover size that overlaps drain opening at least 6-in (152-mm) on each edge. To prevent edges from losing contact with ground surface, do not fill over 5-in (127-mm) in height. Long-lasting durable modified vinyl construction resists damage caused by UV rays.

Helps comply with EPA for stormwater regulations.

Keep drums clean from dirt and debris.

28432

Ground Protection Accessories **NEW**

Improve berm longevity without sacrificing functionality

Ground Mats – Create a smooth, uniform deployment area with this heavy-duty woven fabric. Place under berm for improved wear resistance against rocks and construction debris.

Track Mats – Position inside the berm for extra protection along tire paths. Thick durable, black woven fabric protects the floor and walls from tire abrasion caused by skidding, turning, and braking.

Track Runners – Place this high visibility, yellow vinyl coated fabric inside the berm for moderate protection against tire abrasion.

Improve wear resistance and extend the life of your berm by adding track runners.

Modular design lets you join centers together to fit your space and application.

EcoPolyBlend™ Accumulation Centers and Ramp

Combine units to create your own customized spill-control system

Low-profile centers only measure 5.5-inches (140-mm) high for easy handling of drums. Made with 100% recycled polyethylene, these accumulation centers are nearly impervious to chemicals, including acids and corrosives. Seamless construction eliminates leaks, making them ideal for drum filling and dispensing operations. Self-locating grates won't ride-up, and are removable for easy cleaning. Combine 2-, 4-, 6-, and 8-drum modular units to create your own customized system. Use the optional joining clips to firmly lock units together. Sumps remain separate and clips can be removed for easy repositioning. Also available in non-recycled yellow color.

EPA compliant, supports SPCC, and meets NFPA 1 2009 edition and IFC fire codes.

Use optional Sump-to-Sump™ drain kit (includes joining clips and transfer tube) for applications requiring a continuous sump. Kit allows you to join centers together, on-site, for full compliance with regulations when sump capacities reach 71-gallons (270-liters). Kit includes one pair stainless steel joining clips, one pair rubber grommets, one polytetrafluoroethylene (PTFE) transfer tube. (Patent No US 6,622,879,B1)

Companion Ramp

Load and unload heavy drum with ease. Anti-skid ribs provide maximum safety. Place the ramp anywhere on accumulation centers size 2-drum or larger.

EcoPolyBlend™ Spill Control Pallets

Keep workers safe from accidental slips indoors and avoid costly hazmat cleanup costs

- Protect against ground contamination.
- Comply with EPA and avoid potential fines.

Made of molded 100% recycled polyethylene, these pallets resist chemical attack from hazardous acids, caustics and solvents. The oversized sump holds the contents of up to a 55-gallon (200-liter) drum in the event of leak or rupture—meeting or exceeding the most stringent spill containment regulations. Seamless construction eliminates leaks. Self-locating grates lift off for quick cleanup. Black color hides grime and dirt to keep your workplace looking clean. Choose from square or in-line configurations. Also available in non-recycled yellow color.

EPA compliant, supports SPCC, and meets NFPA 1 2009 edition and IFC fire codes.

Use pallet as a workstation for waste collection.

Easily roll drums into a DrumShed™ for storage.

EcoPolyBlend™ DrumSheds™

Safe, secure, and compliant outdoor storage for drums

Weather resistant DrumSheds™ are made of eco-friendly, 50% recycled polyethylene. Convenient roll top doors allow access from front or rear. A wide, 52-inch (1321-mm) door opening accepts palletized loads. Fully compliant, leakproof pallet sump has removable, durable deck grating for easy cleanup of spills. A spacious interior offers ample headroom for adding funnels or pumps. Safety features include grounding capability, integral anchor bolt locations for wind resistance, and molded lugs to accept padlocks for security. Forklift pockets at the front and back make it easy to relocate empty sheds. Ships fully assembled. Pallets (without shed) also available.

Low Line Pallets (without shed) also available. Two-drum and 4-drum sizes feature ergonomic, low 9-in (229-mm) working height.

EPA compliant, supports SPCC, and meets NFPA 1 2009 edition and IFC fire codes.

Independently green validated by UL Environment.

Steel Spill Containment Pallets

Use rugged, high sump capacity pallets for industrial applications

Constructed of 11-gauge hot rolled steel and strengthened with formed edging, these rugged pallets feature generous sump capacities and are 100% leakproof. Galvanized steel bar grating removes for easy cleaning and keeps drums out of overflow. Large forklift pockets 8.375-in W x 3.875-in H (213-mm W x 98-mm H) make relocation easy. Available in corrosion resistant blue powder-coat or galvanized steel finishes.

EcoPolyBlend™ IBC Pallet and IBC Shed

Reliable spill protection and safe storage for IBCs

- Compliant storage for popular 275- or 330-gal (1000 or 1250-liter) IBCs.
- Compact footprint with ergonomic working height.

Constructed of durable 40% recycled polyethylene, these intermediate bulk container pallets offer excellent chemical resistance. Accepts IBCs up to 48-in W x 48-in D x 53-in H (1219-mm W x 1219-mm D x 1346-mm H). Large leakproof sump exceeds regulations and protects against high volume spills. Sturdy pillar supports accept up to 9,000-lb (4082-kg) uniformly distributed load. Removable pillars make for easy sump cleanup. Pallet features forklift pockets for relocation when empty. Ships fully assembled.

EPA compliant, supports SPCC, and meets NFPA 1 2009 edition and IFC fire codes.

Independently green validated by UL Environment.

EcoPolyBlend™ Spill Trays

Lightweight and low-profile design for small-scale spill control

Made of 100% recycled polyethylene, these eco-friendly spill trays will not rust or corrode. Raised rib bottom adds rigidity and keeps contents out of spills—perfect for pouring and filling applications. Rated for service temperatures between -30° to 120°F (-34 to 49°C).

Two-wheeled design makes for easy transport.

EcoPolyBlend™ Spill Containment Caddy

Get convenient handling, dispensing and built-in spill containment—all in one product!

- Rubber, 10-in (254-mm) wheels roll over bumpy terrain—use indoors or out.
- Single-piece, double-walled seamless design eliminates leaks.

This portable unit with wheels allows one person to easily transport a full 55-gallon (200-liter) drum. Ergonomic design with tilt/stop feature minimizes back strain. Two tension straps hold a drum securely in place. A 66-gallon (250-liter) spill sump contains chemical spills, eliminating hazards and hassles. Exclusive open-view sump design makes cleanup simple and quick. Durable 90% recycled polyethylene construction provides maximum corrosion resistance and leakproof protection. Also, available in non-recycled yellow color.

EPA compliant, supports SPCC, and meets NFPA 1 2009 edition and IFC fire codes.

Black models - 90% recycled content. Independently green validated by UL Environment.

Yellow models have no recycled content

EcoPolyBlend™ Spill Control Funnels

An eco-friendly, cost-effective way to collect liquids and keep drum tops clean

Use these funnels with any closed-head 30- and 55-gallon (110-and 200-liter) drums. Low-profile, wide diameter opening makes it for quick, easy pouring. Scalloped, sloped design minimizes splashes and prevents containers from resting in their own liquids. Large, flat well at the throat of funnel allows for passive draining of paint tins, filters, buckets and other containers.

Funnel for flammable liquids includes a drum fill vent with brass flame arrester, threaded bung cap with tight seal, and pressure relief valve for high temperatures. Molded-in hook stores optional funnel cover.

Wide diameter opening allows for quick and easy pouring.

EcoPolyBlend™ Drum Management System

Organize drums for maximum efficiency, productivity and cost-savings

Space-saving, stackable design stores up to four 30- and/or 55-gallon (110- and/or 200-liter) drums of Class 1B or 1C flammables and combustibles or nonhazardous liquids. 100% recycled molded polyethylene construction provides maximum chemical resistance—preventing corrosion, deterioration and leaks. Molded-in drum lock-channels hold drums in place. The system consists of three parts: a base module, stack module and dispensing shelf.

The Base Module holds two drums with a 3060-lb (1388-kg) total load capacity. Easily relocate the base module with a forklift when empty. The 66-gallon (250-liter) open-view containment sump makes it easy to spot any spills for a quick cleanup.

The Stack Module holds two additional drums to double the system capacity for a load of 1500-lb (680-kg). When storing both 30- and 55-gallon (110- and 200-liter) drums, the smaller drums should be placed on the top of the stack module.

The Dispensing Shelf has a load capacity of 60-lb (27-kg), and mounts securely to the stack module for convenient dispensing from the upper level.

EPA compliant, supports SPCC, and meets NFPA 1 2009 edition and IFC fire codes.

EcoPolyBlend™ drum management system combines efficient drum storage and positive spill control.

Durable construction withstands the rigors of transportation.

Overpack/Salvage Drums

Approved for the transportation of hazardous materials

- Polyethylene drums are DOT/UN certified to the highest “X” rating for Packing Groups I, II, and III solids up to 750-lb (340-kg).

These dual-purpose drums are DOT/UN approved for use as a salvage drum for dry hazardous materials, or as secondary containment for solids or liquids with a 95-gallon (360-liter) sump capacity. Durable 100% polyethylene construction is chemical and weather resistant to withstand the rigors of land, air and sea transportation. Twist-on threaded lid makes closure safe and easy. Simply use a forklift to relocate the drums. Units nest when empty for compact storage. Select from yellow or black polyethylene.

EcoPolyBlend™ Single- and Double-Drum Collection Centers

All-weather construction stands up to the harshest environments

Chemical-resistant 100% recycled polyethylene offers effective and economical spill control for 55-gallon (200-liter) drums. Forklift channels allow for easy relocation (when empty). Lids include lock to prevent unauthorized access.

EPA compliant, supports SPCC, and meets NFPA 1 2009 edition and IFC fire codes.

28683, Dual covers open separately for convenient access to either drum.

Aerosolv® Aerosol Can Disposal System

Safely recycle aerosol cans while reducing disposal costs and minimizing waste

- Save thousands of dollars on hazardous waste disposal costs.
- Turn aerosol cans into recyclable steel—save on landfill space for a cleaner environment.

The Aerosolv® system safely converts spent aerosol cans from solid hazardous waste to a non-hazardous material. It accepts industry standard sized cans with a maximum height of 8½-in (215-mm) and threads directly into a standard 2-in (51-mm) bung on a 30- (110-liter) or 55-gallon (200-liter) drum. Body is made of low maintenance aluminum and all moving parts are 308 stainless steel. A non-sparking pin punctures the can, and the residual liquids flow into the collection drum. One 55-gallon (200-liter) drum holds approximately 4,200 spent aerosol cans. Punctured, discharged, cans do not meet the definition of hazardous waste per EPA 40 CFR 261.23(a)(6), and thus can be treated as recyclable scrap metal.

Attach the two-part combination filter to the 3/4-in (19-mm) bung to filter VOCs from any residual propellants. The bottom coalescing cartridge transforms residual liquids into droplets that collect in the reservoir of the cartridge and safely drain into the drum. The top activated carbon filter cartridge indicates saturation and serves as a replacement reminder. Economical, non color-changing filter is also available. System includes a combination filter, safety goggles, and an anti-static ground wire with alligator clip. EPA compliant.

Use Aerosolv® anywhere you find aerosol cleaners, adhesives, and lubricants.

Description	Shipping Dim. W x D x H	Compliance	Model No	Ship Wt lb/kg
Aerosolv®	18 x 18 x 7 in 457 x 457 x 178 mm	E	28202	12/5

Combination Coalescing/Carbon Filter (non-color changing)	28197
Activated Carbon Cartridge (2pk) (non-color changing)	28198
Aerosolv® Maintenance Repair Kit (for use with any Aerosolv®) Includes: 1 non-sparking puncture pin with O-rings 1 Aeroprene (polychloroprene) gasket 1 Spring 3 bridge pins 1 tube of grease	28200
Replacement Aeroprene (polychloroprene) gasket	28111
Replacement poly sleeve	28181

†Coalescing filter can only be purchased in combination with a carbon filter.

Note: With the 28202 Aerosolv® unit you must leave the last aerosol can punctured and drained clamped in the unit to maintain a closed container as defined by OSHA.

Collect empty aerosol cans in open-head drums . . .
 Popular Cease-Fire® open-head drums are made of durable steel and come in sizes up to 55-gallon (200-liter)—a great way to collect cans for recycling!
 Visit [www.justrite.com](#) for details.

Color Changing Filter

Non-Color Changing Filter

Retrofit your existing #28202 Aerosolv® with #28225 Counter for easy recordkeeping.

Built-in counter is a great tool for easy adherence to your ISO 14001 program.

Aerosolv® Super System

Certified by the EPA's Environmental Technology Verification Program (ETV)

- Built-in counter tracks number of cans punctured.
- Protective coating for easy cleaning.

Aerosolv® Super System offers all the features of the original Aerosolv® system plus greater vapor reduction, easy tracking, and added security. Lockout and shut-off mechanism seals the system and drum when not in use to eliminate the escape of hazardous vapors to meet OSHA requirements. Easily comply with your ISO 14001 program using the built-in counter. Includes a combination coalescing/saturation indicating carbon filter, a padlock with key, anti-static ground wire with C-clamp, and safety goggles.

EPA compliant and ETV certified.

28231

Aerosolv® Dual-Compliant System

Designed to comply with California's vapor emission regulation SB1158

Aerosolv® Dual-Compliant System includes all the great features of the Aerosolv® Super System plus a shut-off valve in the puncturing unit and a check valve in the carbon cartridge to prevent off-gassing. A poly lid cover and a poly containment sump help you stay compliant whether you are accumulating or transporting processed aerosol cans for scrap. Includes a combination coalescing/saturation indicating carbon filter, a padlock with key, antistatic ground wire with C-clamp, and safety goggles.

EPA compliant and ETV certified.

Aerosolv® Dual Compliant Can Disposal System with Counter	27 x 27 x 10 in 457 x 457 x 178 mm	E,V	28231	21/10

Note: See replacement filters above.

Prosolv® System

Safely and economically convert gas cylinders into recyclable steel containers

The Prosoolv® System removes the sealing sleeve and internal valve stem from propane, MAPP, and 3/4-in (19-mm) male threaded calibration gas cylinders (do not use with oxygen bottles). It empties and filters propellants from cylinders converting them into non-hazardous recyclable material.

EPA compliant.
