# SPACE - TRAC

## High Density Mobile Storage System

Maximize Your Storage with Minimum Floor Space

\*Protected by  
NEX Gard

Double your storage space capacity instantly with this economical mobile shelving system. Provides instant access to inventory and allows maximum air and light circulation. Space-Trac is designed to eliminate unnecessary aisles, free-up floor space and increase the number of shelving units that can be used in a designated area. This is done by combining stationary and mobile units, to create or eliminate

aisles as needed. The stainless steel overhead track assures smooth shifting of units, eliminates dirt and debris build-up that usually occurs with floor mounted systems and compensates for uneven floors. Both stationary and mobile units are available with a variety of shelf sizes and finishes. Mobile units have 5" polyurethane wheel casters. Simple installation makes this system practical and easy to use.

## How To Order:

### Simple to Install, Simple to Use

When choosing component parts, the following factors must be determined:

- 1 - **The length of Space-Trac necessary.**  
Combine the widths of necessary stationary and mobile units. Add a minimum of 30" for an aisle and 2" for every mobile unit to compensate for donut bumpers.
- 2 - **All shelves must be same length.** Number and type of shelves can vary.
- 3 - **Height of Unit.** When choosing post height, all units must be same overall height.
- 4 - **Choose shelf finish.** (see chart on page 3)

5 - When ordering a Space-Trac shelving unit, remember:

- A - Each **Stationary Unit** requires 1 Stationary Unit Kit, 4 posts and shelves.
- B - Each **Mobile Unit** requires 1 mobile Unit Kit and shelves.
- C - **Space-Trac Guide Bars** (custom sized to a max. length of 12 ft.) for longer systems require one Joining Insert to connect each additional guide bar ordered.

You must order a guide bar for the front and back length of the system.

# CARTON GRAVITY FLOW RACK

MODEL SHOWN WITH OPTIONAL LABEL HOLDERS

USES GRAVITY TO SLIDE CARTONS TO FRONT FOR EASY ACCESS

## Carton Gravity Flow Rack

Unique "flow" design uses gravity to slide cartons to front for easy access. Loads from the back to ensure that first inventory in is the first inventory out. Tracks can be set at any width to accommodate varying carton sizes. Box guides are used between each pair of roller tracks. Roller tracks support 50 lbs./ft. Additional roller tracks can be added depending upon carton sizes being stored. Each level includes 4 pairs of roller tracks, with 5 box guide rails and one cross support. Double-depth units are two single units bolted front-to-back offering greater capacity. Racks are 96" Wide x 84" High and include 5/8" thick particle board top storage level that supports up to 1,000 lbs.
