New Age began manufacturing in 1966. Forty-five years later, we are the leading aluminum manufacturer in the USA. New Age operates out of a 200,000 square foot facility located in the "Heartland of America" in Norton, Kansas. Our rural workforce has a very strong work ethic and a true understanding of what the word "quality" means.

New Age Industrial is more than just another supplier. New Age buys pure primary grade aluminum billet. We extrude our own aluminum to fit our customers' needs. By controlling the extrusion process, we have unlimited flexibility in product design and durability. Our aging oven gives the aluminum its temper or hardness, ensuring its shape for the duration of its lifetime. New Age has the state of the art computer controlled equipment to maintain the high quality standards that are essential in the welding process. New Age is focused on building aluminum products only, insuring that all our welders are highly skilled at giving a precision weld joint every time.

Our engineering department takes pride in developing and designing products that solve our customers' needs.

Wall/Ceiling Mounted Unit

Ordering Instructions

- Determine the number of shelving sections in the shelving run – Find type, number, and depth of shelves required per section.
- Horizontal braces are not needed.
- Shelving sections 3', 4', and 5' long require two uprights, one left and one right.
- Run lengths over 5' require a left and right upright on the ends and a common upright between each section. (as shown in the picture above).

Note

- Upright height (length) is determined by ceiling height.
- Actual shelf depth from the wall to the front of the shelf is 3" more than the listed shelf depth.
- The actual shelving run length is found by adding 6-1/2" to the sum of the shelf lengths in a shelving run – a typical 7' shelving run which uses a 36" shelf length and a 48" shelf length is actually 90-1/2" long (7' 6-1/2").

Aluminum Security Fence

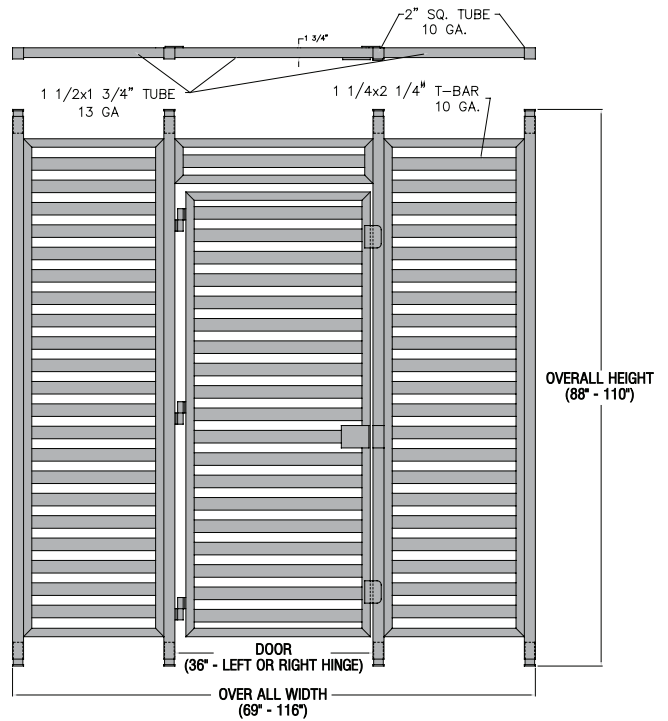

Units Are Mounted To The Floor *and* The Ceiling

- Will not corrode like wire fencing.
- Additional Locking Options Available

Standard units are those that fall between these parameters, with a center door:

Width = 68" - 116"
Height = 88" - 110"

Each fence needs a custom quote. When requesting a Security Fence, we need the **WIDTH & HEIGHT** of the opening for the fence along with the **HINGE POSITION** (left or right). If there are special conditions such as a Ceiling Mounted Condenser or some other object that would require the fence to be modified, we need these dimensions to quote the fence.
